Processing Information: The B. Frank Polk Collection was organized and catalogued by Linda Klouzal in 2013-2014 with assistance from Chesney Medical Archives student employees Malachy Duffy, Dana Ettinger, Barbara Holt, Christina Morello, Faith Owkhonda, Alyssa Perkinson, William Rothkopf, and Katherine Smoak. The project was supported by a Cataloging Hidden Special Collections and Archives grant from The Andrew W. Mellon Foundation, through a program administered by the Council on Library and Information Resources (CLIR). Phoebe Evans Letocha served as the grant's Principal Investigator at the Alan Mason Chesney Medical Archives.

Collection Overview

Extent: 29.21 cubic feet (25 boxes)

Creator: Polk, B. Frank, 1942-1988

Administrative/Biographical History:

Frank Polk was born in San Angelo, Texas in 1942. Polk received his B.A. from the University of Texas at Austin in 1963, his M. D. from Baylor College of Medicine in 1967; and his M. Sc. from Harvard University School of Public Health in 1976. Polk was a resident at St. Luke's Hospital in New York and at Peter Bent Brigham Hospital in Boston. During the 1970s, he was an Assistant Professor of Medicine at Harvard Medical School and a physician at several hospitals in the Northeast including Boston City Hospital, Beth Israel Hospital, Boston Hospital for Women, New England Deaconess Hospital, and Brigham and Women's Hospital in Boston. During this time he taught courses on Infectious Disease and served on Infection Control Committees.

Polk held appointments at Johns Hopkins University from 1982 until his death in 1988. From 1982 until 1985 he was an Associate Professor of Epidemiology in the Department of Epidemiology within the School of Hygiene and Public Health. He held a joint appointment in the School of Medicine, as Associate Professor of Medicine in the Department of Medicine and in the Department of Obstetrics and Gynecology. From 1985 until 1988 Polk was a Professor in each of the three Departments and the Director of the Infectious Disease Epidemiology Program in the Department of Epidemiology at the School of Hygiene and Public Health. He taught courses on Epidemiology, Reproductive and Perinatal Disorders, and AIDS.

Polk conducted research on reproductive disorders, hypertension, cancer and nutrition, and AIDS. While at Harvard he cared for one of Boston's first AIDS patients. Polk was a key figure in the early efforts at Johns Hopkins Medical Institutions to address AIDS as a public health threat and to provide treatment for AIDS patients. Early on he recognized and warned of the possibility of an epidemic. In 1983 he designed a study to follow the natural history

of the disease among gay and bisexual men. The National Institute of Allergy and Infectious Diseases, within NIH, selected Polk's project, which became known as "the Study to Help the AIDS Research Effort (SHARE)," to be the Baltimore site of the longitudinal Multicenter AIDS Cohort Study (MACS). In forming SHARE's advisory board, Polk approached members of the gay community of Baltimore in order to obtain advice about recruitment, publicity, interviewing, confidentiality and other matters about which sensitivity regarding gay lifestyle was important, but which researchers may not have understood. MACS is still ongoing; in addition to Baltimore, it includes sites in Chicago, Pittsburgh and Los Angeles.

Polk was an Advisory Board Member of the First AIDS Service at Johns Hopkins University, the clinical care component of the Johns Hopkins Hospital for serving AIDS patients. In 1984 he established the Outpatient Clinic for patients with HIV infection. Located at the Moore Clinic, it was the first AIDS Clinic in Maryland. Polk served as the director and provided evaluation, treatment, and counsel. In 1986 Polk helped initiate the Hospital's AIDS Inpatient Unit, the 3rd in the country at the time. Polk conducted studies on AIDS transmission and treatment including the risk of HIV infection for recipients of blood transfusions, prison inmates, intravenous drug users, and transmission from mothers to their unborn child. He conducted early studies of experimental drug treatments. Polk was concerned with both immunological and social issues. He was an advocate of AIDS education. He conducted seminars for Baltimore city school principals and collaborated with Maryland Public Television in developing an AIDS video. During the early years of the disease's discovery he encouraged public officials to keep schools open to AIDS patients. He was an early advocate of clean needle exchange programs for IV drug users. Polk served on scientific task forces for the state of Maryland as well as numerous committees and advisory councils pertaining to Obstetrics and Gynecology and AIDS. He co-authored more than 100 scientific articles. He died of a brain tumor in 1988 at the age of 46. In 1989 the AIDS inpatient unit at Johns Hopkins Hospital was named after Polk.

Chronology: 1982-1988 - Johns Hopkins University, School of Hygiene and Public Health
1982-1988 - Johns Hopkins University, School of Medicine

Scope and Content:

The B. Frank Polk Collection consists of Polk's teaching and course files, correspondence, committee files, research materials, and publications relating to his work as a faculty member at The Johns Hopkins University School of Public Health in the Department of Epidemiology and at the School of Medicine in the Departments of Medicine and Gynecology and Obstetrics. The papers document the leadership role Polk played as part of the effort at the Johns Hopkins Medical Institutions to prioritize, understand, and treat patients with AIDS in the years following the appearance of the disease. Polk was active in the creation of an AIDS Treatment Unit at the Johns Hopkins Hospital. The collection includes Polk's research files in Obstetrics and Gynecology and his research on AIDS transmission and treatment. It includes records pertaining to a longitudinal AIDS Study, MACS, the Multicenter AIDS Cohort Study. Polk was the principle investigator for SHARE (Study to Help the AIDS Research Effort), the Baltimore arm of the MACS study. The collection contains an extensive set of reprints of articles co-authored by Polk.

Folder 1: First-AIDS Service - c. 1987-1988

- Creator:** First AIDS Service
The First AIDS Service was the clinical care component of the Johns Hopkins Hospital for AIDS patients, including inpatient and outpatient services. It was organized in 1985 to provide quality and compassionate care utilizing a multidisciplinary staff from the Johns Hopkins Medical Institutions and with assistance from the community. Services included medical and nursing care, social services, and emotional support for patients and their families. It also included a research setting to develop and evaluate treatments as well as a staff skilled in treating the disease. Staff were chosen on the basis of their interest in AIDS care and research.
- Extent:** 1 folder
- Scope and Content:** Polk was an Advisory Board member to the First AIDS Service. Advisory Documents include a detailed description of First AIDS Service, list of committee members, and annual review dated 1988.
- Conditions Governing Access Element:** This folder contains confidential information in the form of a social security number on an undated c.v..

Folder 2: Moore Clinic - 1983-1986

Creator: Johns Hopkins Hospital. Joseph Earle Moore Clinic.

The Joseph Earle Moore Clinic, known as the Moore Clinic, was an outpatient unit of the Johns Hopkins Hospital that was the center of AIDS research and patient treatment at Hopkins. It was the largest AIDS care program in the state of Maryland. The Clinic's Directors have included Joseph Earle Moore, Victor McKusick, William D. Hillis, John Bartlett, William Ruby, Richard Chaisson, and Joel Gallant.

The clinic opened in 1915 as the Venereal Disease Clinic for the purposes of studying and treating syphilis. At the time, the clinic was also called "Department L," referring to an old name for the disease, lues venerea. During World War II, with the introduction of penicillin in the United States, syphilis was brought under control. In 1953, Joseph Earle Moore transformed the clinic into a center for treating chronic diseases, called the "Medicine I Clinic." The clinic was renamed the Joseph Earle Moore Clinic in 1958 in honor of its longtime director and pioneer in the field of venereal diseases who had died in December 1957. Under the subsequent director, Dr. Victor McKusick, the focus of the clinic changed to genetic conditions. The Moore Clinic was designated a Clinical Research Center (CRC) in 1973 and researchers were invited to submit study protocols to conduct outpatient clinical research trials on a small scale.

John Bartlett, Chief of the Infectious Diseases Division, and Epidemiologist, Frank Polk, changed the clinic's focus once more to HIV/AIDS in 1984 and the Moore Clinic became the first AIDS clinic in Maryland. Bartlett and Polk each set aside a half day a week to care for a small group of gay men with AIDS. Polk designed a research project that was the first epidemiological study of the disease, which subsequently became the design for the Multicenter AIDS Cohort Study (MACS), a longitudinal study with research sites in Los Angeles, Philadelphia, Baltimore, and Chicago, and which is still ongoing. Polk and Bartlett treated and studied the first MACS patients through the Baltimore arm of the study, SHARE (Study to Help the AIDS Research Effort).

The staff of the Moore Clinic was multidisciplinary and services included physical examination, lab tests, and counselling. From 1984 until 1987, there was no charge to AIDS patients for care and as of 1987 only those who could afford to pay were charged for services. With its approval and funding as an AIDS Treatment and Evaluation Unit (ATEU) in 1986, patients gained access to new treatments including experimental AIDS drugs. After Polk's untimely death in 1988 of a brain tumor, Polk's leadership during these years persisted and the clinic with its focus on HIV care continued to grow. Bartlett oversaw the international research effort that resulted in 1997 in the development of the antiretroviral drug therapy for treating HIV infection.

Residing until 2017 in the Carnegie Building of the Johns Hopkins Hospital, the outpatient unit was known as the Moore Clinic for HIV Care. Supervised by the Hopkins AIDS Service, it offered services specialized for patients with HIV infection. The Moore Clinic ceased operation when the Johns Hopkins Hospital opened John G. Bartlett Specialty Practice for Patients with Infectious Diseases on May 8, 2017 in the Edwards Park Building. The new Bartlett Specialty Practice co-locates much needed services for patients with a range of infectious diseases, including HIV.

Series 4: Research Files - 1983-1988

Scope and Content: Scope and Content Element: The bulk of the research files contain records related to Polk's research in the areas of Gynecology and Obstetrics and AIDS, with the latter being the largest grouping. In addition, several files pertain to other research interests of Polk including coronary heart disease, cancer, hepatitis, and vaccination. The subject files include documents pertaining to transmission, research, and treatment of gynecological and AIDS-related medical disorders. Materials include correspondence, photocopied journal articles, hand written notes, research studies, human subjects forms, research questionnaires, conference programs, lecture materials, papers reviewed by Polk, abstracts, progress reports, grant applications and research proposals for studies by Polk. Interspersed among the subject files are files about faculty and administrators at Johns Hopkins and elsewhere. This series also contains files pertaining to the Joint

Committee on Clinical Investigation (JCCI), which was in charge of human subjects review at Johns Hopkins University. JCCI files include procedures updates, research project notification and consent forms for studies for which Polk was the investigator, as well as one annual renewal request for a study for which Polk was a reviewer. GRID, Gay Related Immune Deficiency was an early name for AIDS.

The titles of research projects on forms listing Polk as the principle investigator include: A Case-Control Study of Endometriosis; Cervicitis During Pregnancy Study; Comparative Immunogenicity and Safety of Human Plasma Vaccine vs. Recombinant DNA Vaccine for Hepatitis B in Homosexual Men; Dietary Markers for Epidemiologic Studies of Cancer; Evaluation of HTLV-III Antibody Test; Evaluation of a New Antibody Assay for HTLV-III; Genital Infections and Perinatal Outcomes; Levels of Cefazolin and Deforamide in Pelvic Tissues Over Time; Microbiologic Studies in Women Undergoing Elective Hysterectomy; Multiple Dose, Open-Label Clinical Trial to Determine the Tolerance & Preliminary Efficacy of PHA-23 for Patients with the Acquired Immunodeficiency Syndrome (AIDS); The Natural History of Acquired Immune Deficiency Syndrome (AIDS) in Homosexual Men; Preventing Chlamydial Infection in Children and Infants; Retinopathy of the Acquired Immune Deficiency Syndrome; Risk Factors for Hospital Acquired Surgical Wound Infection after Cardiac Surgery; Risk Factors in the Occurrence of Juvenile-onset Laryngeal Papilloma; The Risk of Adverse Pregnancy Outcome Following Cervicitis During Pregnancy; The Risk of HIV Transmission by Screened Blood; Rubella Vaccine Study; Survey of Use of Prophylactic Antibiotics for Elective Hysterectomy.

Archival Arrangement: Research files contain three sub-series, starting with Gynecology and Obstetrics, then AIDS, and thirdly other research interests. The first two sub-series each contain a set of subject files and a set of research studies records. Files within sections are organized in alphabetical order by folder title.

Sub-series 4.1: Gynecology and Obstetrics Files - 1983-1988

Scope and Content: The bulk of the subject files consist of photocopied journal articles and reprints that were not authored by Polk. These files also contain a small amount of other materials including hand written notes about the articles; teaching materials; correspondence; papers reviewed by Polk; abstracts; progress report data, questionnaires and forms; grant applications and research proposals; and a few reprints and correspondence about publications by Polk, organized topically among the files. The PROM (Preterm Premature Rupture of Fetal Membranes) Study materials include records for a Pilot study and for a multicenter case control study with perinatal centers at several collaborating institutions. Records include correspondence, proposals, notes, human subjects records, research forms, questionnaire, and information about study participants.

Sub-sub-series 4.1.1: OB/GYN Subject Files - 1983-1988

Scope and Content: The bulk of Polk's Gynecology and Obstetrics subject files comprises photocopied journal articles and reprints that were authored by other scholars. A small amount of records includes information for use in creating teaching slides, teaching notes, lecture schedules, and printed lecture materials; hand written notes on photocopied articles; printed data on studies; printed papers by other researchers; correspondence; newspaper clippings; library search-generated bibliographic lists; conference and workshop programs; abstracts; progress reports; research data; questionnaire forms; grant applications and research proposals for research projects by Polk; and reprints and correspondence about publications by Polk. Studies referenced in the files for which Polk was an investigator include the following: "Cervicitis During Pregnancy Study", "Levels of Cefazolin and Deforamide in Pelvic Tissues Over Time", "Microbiologic Studies in Women Undergoing Elective Hysterectomy" [Polk's participation uncertain], "Preventing Chlamydial Infections in Infants and Children", "Risk factors in the occurrence of juvenile-onset laryngeal

papilloma", "Rubella Vaccine Study", and "Survey of Use of Prophylactic Antibiotics for Elective Hysterectomy".

Sub-series 4.2: AIDS Files - 1983-1988

Creator: AIDS Clinical Trials Group (ACTG)
The AIDS Clinical Trials Group (ACTG) was established in 1987 and funded by the Department of Health and Human Services. The objective was to broaden the scope of the AIDS research of the NIAID. It established the largest network of clinical investigators and clinical trials units in the world. The mission was to investigate the viral and immune pathogenesis of HIV infections and its complications; to evaluate approaches and strategies for treatment; and promote the publication and dissemination of study findings.

AIDS Treatment and Evaluation Unit (ATEU)
In 1986 the first AIDS Treatment and Evaluation Units (ATEU) were established by the National Institutes of Health to examine treatment options for HIV infection. Johns Hopkins was one of 19 centers approved by the NIH as a federally funded ATEU. The research was focused on new treatments that prevented HIV from replicating. The unit was set up to test experimental drugs on AIDS patients. The Principal Investigator of the Johns Hopkins ATEU was John Bartlett, Chief of the Division of Infectious Diseases. Data from ATEU studies was gathered and analyzed by the AIDS Clinical Trials Coordinating Center to facilitate collaborative studies and speed up the evaluation of drugs.

Sub-sub-series 4.2.2: AIDS Studies - 1983-1988

Sub-sub-sub-series 4.2.2.1: MACS (Multicenter AIDS Cohort Study), SHARE (Study to Help the AIDS Research Effort), & Related Studies - 1983-1988

Creator: Multicenter AIDS Cohort Study (MACS)
In 1983, Frank Polk, Epidemiologist, designed a study to follow the natural history of AIDS among gay and bisexual men. The National Institute of Allergy and Infectious Diseases (NIAID) within the National Institutes of Health funded Polk's project as part of a collaborative study known as the Multicenter AIDS Cohort Study (MACS). Polk was the principle investigator and an advisory board member of SHARE, the Study to Help the AIDS Research Effort, the name of the Baltimore center of MACS. Starting in 1983, collaboration began among the Johns Hopkins University School of Medicine, the Johns Hopkins University School of Hygiene and Public Health, the City of Baltimore, the State of Maryland, local gay organizations, and the University of Maryland. Study participants were seen at the Johns Hopkins Hospital Moore Clinic on four evenings a week and on one weekend day. They were given medical evaluations at three to six month intervals.
Polk recruited a lawyer who was a lobbyist and gay rights activist to lead the SHARE Advisory Board and to select Board members, which helped to reach men in the gay community, learn about their concerns and political issues, and obtain their confidence. It was important to ascertain that the investigators were not evaluating homosexuality per se. Another concern was that the researchers would guarantee confidentiality to volunteers who feared being stigmatized. In 1987, the Johns Hopkins University Department of Epidemiology, within the School of Hygiene and Public Health, was awarded a contract to be the Center for the Analysis and Management of the MACS study data (CAMACS). MACS is a longitudinal study and is still ongoing. The three other centers are located in Los Angeles, Philadelphia, and Chicago.

Extent: 4 Boxes (4.8 cubic feet)

Scope and Content: Files cover every aspect of the MACS study including SHARE Advisory Board records (minutes, notes, correspondence, and directories); committee meeting records, including the Steering Committee; proposals (technical and business); research study protocols; forms and form letters; Human Subjects guidelines; study related papers; abstracts for conferences and journal articles; MACS studies of AIDS related conditions; budget information; questionnaires; laboratory records; reports (annual reports, progress reports, final report); materials about the Chicago and Los Angeles sites; computer equipment; statistics; and information for the media.
Noteworthy collection documents include a description of CAMACS and how study data would be managed (See CAMACS file); a paper titled "MACS: Rationale, Organization, and selected characteristics of the participants" (see Data Abstracts and Publications file); Final Report "The

Natural History of Acquired Immune Deficiency Syndrome (AIDS) in Homosexual Men," September 29, 1987 (See Reports); and the October 1983 SHARE Advisory Board minutes that contain notes on the rationale for the study, the advantage of having a cohort study, interest in addressing psychological stress and depression, concerns over possible weaknesses in the study, how to address Gay issues that researchers were unfamiliar with, facilitating discussion about gay social and political issues, issues pertaining to methodology, the study's relationship with the press, and Johns Hopkins personnel policies concerning gay employees. MACS-related studies include: Diarrhea Study; Evaluation of Delayed Hypersensitivity to Skin Testing Among Gay Men; Evaluation of a new Antibody Assay for HTLV-III; and Neuropsychological Studies (Neurologic and Psychiatric Manifestation of the HTLV-III Infection or Neoropsych Study).

Archival Arrangement: The MACS/SHARE Study records includes a set of subject files and a set of correspondence files. Subject files are arranged in alphabetical order by folder title.

Subject - Name: Multicenter AIDS Cohort Study (MACS)

Sub-sub-sub-sub-series 4.2.2.1.1: MACS/SHARE Correspondence Files - 1983-1988

Extent: folders

Scope and Content: Polk's research correspondence includes letters from the Dean of the School of Public Health, D. A. Henderson; the President of Johns Hopkins University, Steven Muller; Director of the AIDS Clinical Unit at the Johns Hopkins Hospital, John Bartlett; the Mayor of Baltimore, William Donald Schaefer; as well as letters to the U. S. Department of Education about children with AIDS attending school; correspondence with leaders of local and state Gay Rights Organizations; pilot study participants' feedback; and Guides for Institutional Review Boards for AIDS Studies.

Archival Arrangement: Correspondence is organized in alphabetical order by correspondent's last name. Some letters are filed by the subject of the letter or by the name of the organization. Individual letters for the same correspondent are organized in chronological order by date.

Related Archival Materials Element: See also files about Polk's colleagues interspersed among the B. Frank Polk Collection. These files are located in the AIDS subject files and the correspondence files from the Department of Epidemiology records.

Folder259: SHARE Vaccine Study Analysis - 1986

Extent: 1 folder

Folder260: Viral Research - 1985

Extent: 1 folder

Folder261: MACS Virology Meeting - 1986 - 1987

Extent: 1 folder

Folder262: MACS Virus Culture - 1985 - 1986

Extent: 1 folder

Conditions Governing Access Element:

This folder contains protected health information in data attached to an item dated 8/13/1986, which contains participant identification numbers. It contains additional protected health information, in the form of patient names, in results attached to a letter dated 8/7/1985.

Folder263: Virus Isolation Case Control Study - 1986

Extent: 1 folder

Folder264: Virus Lab Meeting - n.d.

Extent: 1 folder

Folder265: SHARE Visit One (1) - 1986

Extent: 1 folder

Folder266: SHARE Visit Two (2) - 1985

Extent: 1 folder

Conditions Governing Access Element:

This folder contains protected health information in items dated 11/18/1985 and 4/15/1986, which both include participant identification numbers.

Folder267: SHARE Visit Three (3) - 1985

Extent: 1 folder

Folder268: MACS Visit Three (3) Datatape - 1986

Extent: 1 folder

Folder269: Visit Five (5) Progress Report - 1986

Sub-sub-sub-series 4.2.2.2: AIDS Drugs Studies - 1983-1988

Extent: 1 box (1.2 Cubic feet)

Scope and Content: Materials pertain to research treating AIDS patients with experimental drugs including antiretroviral drugs, such as AZT. Includes drug literature; drug fact sheets; ACTG (AIDS Clinical Trials Group) Committee meeting minutes and correspondence; workshop programs; Polk's hand written notes; copies of AIDS drugs articles; ATEU (AIDS Treatment Evaluation Units) records including progress reports; copies of grant applications; research study protocols; JCCI correspondence and consent forms; patient medical records; analyses and summaries of clinical data; and copies of papers. Contains correspondence with Pharmaceutical companies and from physicians to JCCI Acting Chairman concerning patient's response to treatment.

Polk was the investigator on the following Studies of AIDS related illnesses treated with drugs: DHPG Compassionate Use in Patients with Serious or Life Threatening Cytomegalovirus Infections; Multiple Dose, Open-Label Clinical Trial to Determine Tolerance and Preliminary Efficacy of HPA-23 in Patients with AIDS; Study Comparing Ribavirin to Placebo in Asymptomatic Pre-AIDS Patients.

Archival Arrangement: Files are arranged in alphabetical order by the name of the drug studied.

Folder 1: AIDS Treatment, General - n.d.; 1984 - 1988

Extent: 1 Folder; 1 folder

Folder 2 - 3: ATEU (AIDS Treatment Evaluation Unit) - 1987 - 1988

Extent: 2 Folders; 2 folders

Conditions Governing Access Element: Folder 2 contains possible protected health information in a letter dated 7/13/1988. It also contains possible study participant information

in two copies of an undated list. Folder 2 contains confidential personnel information in the form of salaries and social security numbers in a grant application.

Folder 4: AZT (Azidothymidine) - n.d.; 1986 - 1988

Extent: 1 Folder; 1 folder

Conditions Governing Access Element: This folder contains protected health information related to study participants in an undated Data Management report, which contains participant's study identification numbers, and in a report attached to a letter dated 7/14/1987, which contains participants' identification numbers and status in the study.

Folder 5 - 10: DHPG (Dihydroxypropoxymethylguanine) - 1983 - 1988; n.d.

Extent: 6 Folders; 6 folders

Conditions Governing Access Element: Folder 5-7 contain protected health information throughout the entire folder, including the initials, names, ages and conditions of participants in the DHPG trial. Folder 8 contains protected health information in: a letter dated 6/5/1986 which references a study participant; a completed study consent form, which contains the study participant's name, date of birth, and study identification number; an undated results printout, which contains participant initials and test results; undated Medical Record Notes; and completed Patient Information forms. Folders 9-10 contain protected health information throughout their entirety. Additionally, Folder 9 may contain confidential study information.

Folder 11: DFMO (Diflouromethylornithine) - 1985; n.d.; 1987

Extent: 1 Folder; 1 folder

Conditions Governing Access Element: This folder contains protected health information in: a memo dated 4/8/1987 which documents study participant initials and the medications they received; a letter from BFP dated 10/10/1985 which contains the name of and information on a study participant; a letter to BFP dated 7/5/1985 which contains study participant initials; and a completed consent form dated 7/7/1985 which contains the name of a study participant.

Folder 12: HPA - 23 (Heteropolyanion) - 1985 - 1986

Extent: 1 Folder; 1 folder

Conditions Governing Access Element: This folder contains protected health information throughout, in the form of patient names, results and medical charts.

Folder 13 - 17: HPA (Heteropolyanion) - 23 Study - n.d.; 1984 - 1986

Extent: 5 Folders; 5 folders

Conditions Governing Access Element: Folder 13 contains confidential personnel information in a letter dated 6/20/1986 which evaluates the performance of study staff.

Folder 18: HPA (Heteropolyanion) - 23 Communications - 1985 - 1986; n.d.

Extent: 1 Folder; 1 folder

Conditions Governing Access Element: This folder contains protected health information in: a letter dated 5/27/1986 which lists study participants' initials and test results; an undated, handwritten list of study participants' names and social security numbers; 16 pages of completed forms which contain participants' identification numbers, initials and a variety of test results; five pages of Drug Accountability forms which contain study participants' initials and treatment; letters dated 4/29/1986, 3/10/1986, 3/25/1986, & 3/17/1986 which contain participants' initials and results; a graph which contains participants' initials; and an undated JHH Investigational Drug Data sheet which contains participants' names and treatments.

Folder 19 - 31: HPA (Heteropolyanion) - 23 Study Participant Patient Files - 1985 - 1986

Extent: 13 Folders; 13 folders

Conditions Governing Access Element: Folders 19-31 are study participant files and contain protected health information and patient records throughout their entirety.

Folder 32: Ribavirin File - n.d.; 1987

Extent: 1 Folder; 1 folder

Folder 33 - 34: Suramin and Other Prescription Drugs for AIDS - 1983 - 1985; n.d.

Extent: 2 Folders; 2 folders

Sub-sub-sub-series 4.2.2.3: "Detection of HIV-1 Infection by PCR in Seronegative Drug Users" - 1988

Extent: 1 folder

Folder 1: Grant: "Detection of HIV-1 Infection by PCR in Seronegative Drug Users" - 1988; n.d.

Extent: 1 Folder; 1 folder

Conditions Governing Access Element: This folder includes confidential personnel information in the form of social security numbers contained in a grant application.

Sub-series 4.3: General Subject Files - 1983-1988

Archival Arrangement: Files are arranged in alphabetical order by topic: Cancer, Coronary Heart Disease, Causality, Hepatitis, Journal Subscriptions, and Vaccines.

Folder 1 - 4: Cancer, Lymphocytes, and Smoking - 1988; 1966; 1983; 1975; 1985 - 1988; 1984; 1981; 1977; n.d.; 1986

Extent: 4 folders

Scope and Content: Folder 1 contains documents from 1986, 1988, n.d.
Folder 2 contains documents from 1988
Folder 3 contains documents from 1966, 1975, 1983, 1985 - 1988
Folder 4 contains documents from 1975, 1977, 1981, 1983, 1984, 1986, 1987, n.d.

Conditions Governing Access Element: Folder 3 contains protected health information in a questionnaire (date illegible) which notes a patient identification number and in six pages of lab reports from April 1987. Folder 3 additional contains potentially confidential evaluative information in a letter dated 12/1/1986.

Folder 5 - 6: Cancer and Viruses - 1985; 1975; 1979 - 1983

Extent: 2 folders

Scope and Content: Folder 5 contains documents from 1975, 1979 - 1983, 1985
Folder 6 contains documents from 1975, 1979 - 1983, 1985

Folder 7: Causality - 1978; 1986; n.d.

Extent: 1 folder

Folder 9: HAVAB (Anti-Hepatitis A Virus) Results - 1982; 1984 - 1986; n.d.; 1978 - 1979

Extent: 1 folder

Folder 10: Hepatitis A - 1978 - 1981; 1983 - 1985; 1971; 1968; n.d.; 1970; 1967

Extent: 1 folder

Conditions Governing Access Element: This folder contains protected health information in the form of a patient record included in a summary from New York Hospital.

Folder 11: Hepatitis B - 1982

Extent: 1 folder

Folder 12 - 14: HBV (Hepatitis B Vaccine) Immunization - 1982 - 1987; n.d.

Extent: 3 folders

Scope and Content: Folder 12 contains documents from 1982, 1983, n.d.
Folder 13 contains documents from 1980, 1981, 1983, 1986, 1987, n.d.
Folder 14 contains documents from 1982 - 1987, n.d.

Conditions Governing Access Element: Folder 12 contains protected health information in the form of study participant identification numbers in items dated 7/14/1983; 4/7/1983; 3/16/1983; 6/1/1983; 4/22/1983. This folder additionally contains potentially confidential evaluative information in a letter dated 6/9/1983.

Folder 15: HBV (Hepatitis B Vaccine) Etiology, Screening, etc. - 1978 - 1980; 1967; 1982 - 1985; n.d.; 1972

Extent: 1 folder

Folder 16: Hepatitis Delta Virus - 1981; 1986; 1983; 1985

Extent: 1 folder

Folder 17: Journal Subscriptions - 1982 - 1985; n.d.; 1983; n.d.; 1984

Extent: 1 folder

Folder 18 - 20: MMWR, Morbidity and Mortality Weekly Report - 1983 - 1989

Extent: 3 folders

Folder 21 - 22: Vaccines - 1982 - 1983; 1967 - 1978; n.d.

Extent: 2 folders

Scope and Content: Folder 21 contains documents from 1967 - 1969, 1970, 1971, 1973 - 1976, 1983, n.d.

Folder 22 contains documents from 1970, 1972, 1974 - 1978, 1982

Conditions Governing Access Element: Folder 21 contains protected health information, including patient initials, age, and medical history in New York Hospital Grand Rounds dated 2/27/1969.

Sub-series 4.4: General Study Review Files - 1981-1988

Archival Arrangement: Files includes documents related to the review of research studies conducted by Polk, on topics related to Gynecology and Obstetrics, AIDS, and other topics.

Folder 1: Committee on Human Volunteers - 1985

Extent: 1 folder

Folder 2 - 4: Joint Committee on Clinical Investigation - 1981-1988; n.d.

Extent: 3 folders

Conditions Governing Access Element: The first folder contains protected health information in an undated study document with a table dated July 1981-June 1982 (p.4), which contains patient initials, hospital numbers, and treatments. It contains additional protected health information in an item dated 6/12/1984. This folder also contains confidential information in an item dated 3/8/1984. The third folder contains protected health information in an item dated 3/20/1986; two unique items both dated 6/19/1985; and an item dated 3/11/1985.

Series 5: Publication Files - c.1972-1989

Scope and Content: The Publication files include an extensive run of reprints of articles co-authored by Polk as well as reviews and book chapters and monographs.

Archival Arrangement: Publication files include three distinct sub-series: reprints, reviews, and book chapters and monographs. Within each sub-series publications have been arranged in chronological order according to the numbering system on Polk's curriculum vitae bibliography, principally by publication date.

Sub-series 5.1: Reprints - 1972-1989

Folder 1: 1-Evaluating Sweat Gland Activity with Imprint Techniques - 1972

Extent: 1 folder

Scope and Content: reprint

Folder 2: 2- The Hypertension Detection & Follow-up Program - 1973

Extent: 1 folder

Scope and Content: reprint

Folder 3: 3-Endobronchitis and Mycobacterium fortuitum - 1974

Extent: 1 folder

Scope and Content: reprint

Folder 4: 4-The Hypertension Detection & Follow-Up Program - 1976

Extent: 1 folder

Scope and Content: reprint

Folder 5: 5-Bacteroids fragilis subspecies in clinical isolates - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 6: 6-Isolation and identification of encapsulated strains of Bacteroides fragilis - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 7: 7-Methods for quantitative Vaginal flora studies - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 8: 8-Blood pressure from fourteen communities: A two stage screen for hypertension - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 9: 9-The Hypertension Detection and Follow-Up Program: A Progress Report - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 10: 10-HDFP Cooperative Group. Race, education, and prevalence of hypertension - 1977

Extent: 1 folder

Scope and Content: reprint

Folder 11: 11-Mild Hypertensives in the Hypertension Detection & Follow-Up Program - 1978

Extent: 1 folder

Scope and Content: reprint

Folder 12: 12-Cervical & Vaginal bacterial flora: ecological niches in the female lower genital tract - 1978

Extent: 1 folder

Scope and Content: reprint

Folder 13: 13-HDFP Cooperative Group. Patient participation in a hypertension control program - 1978

Extent: 1 folder

Scope and Content: reprint

Folder 14: 14-HDFP Cooperative Group. Variability of blood pressure and the results of screening in the HDFP - 1978

Extent: 1 folder

Scope and Content: reprint

Folder 15: 15-Therapeutic control of blood pressure in the Hypertension Detection and Follow-Up Program - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 16: 16-Predictive value of single diagnostic test: A belated correction (letter) - 1979

Extent: 1 folder

Scope and Content: reprint and correspondence

Folder 17: 17-Seal finger - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 18: 18-The implications of blood pressure variability for clinical and screening purposes - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 19: 19-Five-year findings of the HDFP-Reduction in mortality of persons with high blood pressure including mild hypertension - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 20: 20-HDFP Cooperative Group. Five year findings of the HDFP:2. Mortality by race, sex, and age - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 21: 21-Identification of site of Urinary tract infections by antibody-coated bacteria assay - 1979

Extent: 1 folder

Scope and Content: reprint

Folder 22: 22-Serum antibody response to Bacteroides fragilis in women with abscesses following hysterectomy - 1980

Extent: 1 folder

Scope and Content: reprint

Folder 23: 23-An evaluation of the Vita-Stat automatic blood pressure measuring device - 1980

Extent: 1 folder

Scope and Content: reprint and newspaper clip mentioning article about Vita-Stat

Folder 24: 24-Randomized clinical trial of perioperative cefazolin in preventing infection after hysterectomy - 1982

Extent: 1 folder

Scope and Content: reprint and rough draft of article

Folder 25: 25-Outbreak of rubella among hospital personnel - 1980

Extent: 3 folders

Scope and Content: reprint, rough draft of article, copyright agreement, letter from Polk to editor where article was published, comments from reviewer on article, confirmation from editor that article was going to be published, and request from Polk to unidentified persons to fill out a questionnaire regarding the impact of the article.

Folder 26: 26-The instability of blood pressure variability over time - 1981

Extent: 2 folders

Scope and Content: reprint, critique of article from person working at a clinical research center, reviewer's comments for article typed on a page, confirmation from editor that article will be published, a list of responses to a specific reviewer's comments from one of the authors of the article, full rough draft with a reviewer's comments on it, a letter from the publisher thanking the authors and listing prices for reprints and also a completed form for ordering additional reprints by Polk

Folder 27: 27-Perinatal echovirus infection: Risk of transmission during a community outbreak - 1981

Extent: 1 folder

Scope and Content: reprint, letter from associate editor urging authors to submit a revised manuscript along with attached page of comments to be addressed in revised manuscript, an author's response to reviewer's comments attached to a revised manuscript of article

Folder 28: 28-Management of the mildly hypertensive patient - 1981

Extent: 1 folder

Scope and Content: reprint of a letter to the editor reviewing/critiquing another article

Folder 29: 29-A controlled comparison of joint reactions among adult women receiving one of two rubella vaccines - 1982

Extent: 1 folder

Scope and Content: reprint, letter from editor accepting manuscript contingent upon revisions, letter from secretary to Polk informing him that the revised paper is ready for publication and math notes

Folder 30: 30-Five year findings of the HDFP Reduction in stroke incidence among persons with high blood pressure - 1982

Extent: 1 folder

Scope and Content: reprint,

Folder 31: 31-Randomized clinical trial of perioperative cefoxitin in preventing maternal infection after primary cesarean section - 1982

Extent: 1 folder

Scope and Content: reprint, letter to Polk from company asking for permission to reprint and distribute article within their organization, letter to editor from Polk outlining the revisions made, letter from editor giving directions for resubmitting the manuscript attached to reviewer's comments, copies of data tables from article

Folder 32: 32-Effect of B complex and ascorbic acid on the antimicrobial activity of cefazolin sodium - 1982

Extent: 1 folder

Scope and Content: reprint, rough draft of article, potentially revised manuscript, letter from managing editor informing one of the authors that the article will be published

Folder 33: 33-Increased mortality associated with nosocomial urinary tract infection - 1982

Extent: 4 folders

Scope and Content: reprint, rough draft of article attached to letter to editor asking for the article to be considered and reviewed, a copy of the article with comments attached to one of the author's responses to the comments, a letter from the Deputy Editor confirming that the article will be published, letter to editor explaining why another revised manuscript was sent attached to a revised manuscript, comments on manuscript, letter from associate editor saying manuscript needs to be revised,

Folder 34: 34-The effect of treatment on mortality in "mild" hypertension. Results of the HDFP - 1982

Extent: 1 folder

Scope and Content: reprints

Folder 35: 35-Risk factors for infection at the operative site following abdominal or vaginal hysterectomy - 1982

Extent: 5 folders

Scope and Content: reprints, rough drafts, correspondence

Folder 36: 36-Benefit-cost analysis of anti-microbial prophylaxis in abdominal and vaginal hysterectomy - 1979-1983

Extent: 3 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 37: 37-Predictive values of routine blood pressure measurements in screenin for hypertension - 1983

Extent: 2. folders

Scope and Content: reprints, correspondence, rough drafts

Folder 38: 38-Malformations in infants of diabetic mothers:problems in study design - 1983

Extent: 1 folder

Scope and Content: reprints

Folder 39: 39-Reduction of mortality associated with nosocomial urinary tract infection - 1982-1983

Extent: 2 folders

Scope and Content: reprints, rough drafts, annotated rough drafts

Folder 40: 40-Baseline Physical Examination Characsteristics of the Hypertensive Participants - 1983

Extent: 2 folders

Scope and Content: reprints

Folder 41: 41-Prediagnostic serum selenium and risk of cancer - 1983

Extent: 2 folders

Scope and Content: reprints, annotated rough drafts, correspondence, rough draft

Folder 42: 42-Bacterial flora of the vagina: Quantitative Study - 1982-1984

Extent: 1 folder

Scope and Content: reprints, annotated rough draft

Folder 43: 43-Disability days associated with detection and treatment in a hypertension control program - 1984

Extent: 1 folder

Scope and Content: reprints, rough draft

Folder 44: 44-Relation of Serum Vitamins A & E and Carotenoids to the risk of cancer - 1983-1984

Extent: 4 folders

Scope and Content: reprints, rough drafts, correspondence

Folder 45: 45-Hepatitis B vaccine in health care personnel: Safety, immunogenicity and indications of efficacy - 1984-1988

Extent: 1 folder

Scope and Content: reprints, correspondence/memorandum

Folder 46: 46-Effect of stepped care treatment on the incidence of myocardial infarction and agina pectoris - 1984

Extent: 1 folder

Scope and Content: reprints

Folder 47: 47-A Multivariate Analysis of Risk Factors for Hepatitis B virus Infection among Hospital Employees Screened for Vaccination - 1984

Extent: 1 folder

Scope and Content: reprints

Folder 48: 48-Five year findings of the HDFP: Mortality by race-sex and blood pressure level. A further analysis - 1984

Extent: 1 folder

Scope and Content: reprints

Folder 49: 49-The HDFP study of serum retinol, retinol-binding protein, total carotenoids and cancer risk: A summary - 1984

Extent: 1 folder

Scope and Content: reprints

Folder 50: 50-Microvascular Aspects of AIDS Retinopathy - 1984

Extent: 1 folder

Scope and Content: reprints, rough draft

Folder 51: 51-The effect of anti-hypertensive drug treatment on mortality in the presence of resting ECG abnormalities at baseline: The HDFP experience - 1984

Extent: 1 folder

Scope and Content: reprints

Folder 52: 52-A comparative trial of cefazolin and moxalactam prophylaxis for preventing infection after abdominal hysterectomy - 1985

Extent: 1 folder

Scope and Content: reprints

Folder 53: 53-HDFP Cooperative Group. Five year findings of the Hypertension Detection and Follow-Up Program. IV Prevention and reversal of left ventricular hypertrophy and cardiomegaly with antihypertensive drug therapy - 1985

Extent: 1 folder

Scope and Content: reprints

Folder 54: 54-Isolated antibody to Hepatitis B surface antigen: Natural history and response to hepatitis B vaccination - 1985

Extent: 1 folder

Scope and Content: reprints

Folder 55: 55-Absence of Antibodies to HTLV-III in health workers after hepatitis B vaccination - 1985

Extent: 1 folder

Scope and Content: reprints

Folder 56: 56-Female-to-Male Transmission of AIDS - 1985

Extent: 1 folder

Scope and Content: reprints

Folder 57: 57-Demonstration by in situ hybridization of cytomegalovirus but not human T-lymphotropic virus type III in retinal lesions in patients with AIDS - 1986

Extent: 1 folder

Scope and Content: reprints

Folder 58: 58-Rarity of cesarean delivery in cases of juvenile-onset respiratory papillomatosis - 1986

Extent: 1 folder

Scope and Content: reprints

Folder 59: 59-Risk factors for nosocomial urinary tract infection - 1986

Extent: 1 folder

Scope and Content: reprints

Folder 60: 60-Effects of labelling and treatment of hypertension on perceived health - 1986

Extent: 2 folders

Scope and Content: reprints, rough drafts

Folder 61: 61-The Association of Postural Changes in systolic blood pressure and Mortality in persons with diastolic hypertension: The HDFP experience - 1986-1987

Extent: 3 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 62: 62-Reproducibility and predictive values of routine blood pressure measurements in children: Comparison with adult values - 1986-1987

Extent: 4 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 63: 63-Nonresponsiveness to hepatitis B vaccine in health care workers: Results of vaccination and genetic typings - 1986

Extent: 2 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 64: 64-Detection of antibodies to HIV in dried blood on filter papers - 1986-1988

Extent: 2 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 65: 65-Early Antibodies in HIV Detection by the ELISA, Western blot, and Radioimmunoprecipitation - 1987

Extent: 1 folder

Scope and Content: reprints

Folder 66: 66-The prevalent cohort study and AIDS - 1986-1987

Extent: 2 folders

Scope and Content: reprints, rough draft, annotated rough draft

Folder 67: 67-HIV in hemodialysis patients - 1986-1988

Extent: 3 folders

Scope and Content: reprints, correspondence, annotated rough draft,

Folder 68: 68-Predictors of AIDS developing in a cohort of seropositive homosexual men - 1987

Extent: 1 folder

Scope and Content: reprints, synopsis

Folder 69: 69-Delayed Hypersensitivity Skin Testing and Anergy in a population of gay men - 1986-1987

Extent: 1 folder

Scope and Content: reprints, correspondence, rough drafts with typed comments

Folder 70: 70-Risk Factors for Seroconversion to HIV Among Male Homosexuals - 1986-1987

Extent: 2 folders

Scope and Content: reprints, correspondence, rough drafts

Folder 71: 71-Flow cytometric quantitation of T cell phenotypes in cerebrospinal fluid and peripheral blood of gay men with and without antibodies to HIV - 1987-1988

Extent: 2 folders
