Administrative/Biographical History:

Thomas B. Turner

28 Jan 1902- 22 Sept 2002

Thomas B. Turner was born January 28, 1902 in Prince Frederick, Calvert County, Maryland where he received his elementary education in a one-room school house. Attending St. John's College in Annapolis he acquired a foundation in the classics and earned a B. S. degree in 1921. He remained active for many years as a St. John's alumnus. Turner attended the University of Maryland Medical School, receiving his M. D. in 1925. He came to Johns Hopkins University School of Medicine in 1927 as a Jacques Loeb fellow and was assigned to the syphilis unit. During the early years of his career, he developed an expertise in the biology of spirochetal organisms, the family of bacterium containing organisms that cause leprosy, syphilis (*treponema pallidum*), yaws, and Lyme disease, among others.

Although he originally intended to return to Calvert County as a country doctor, his passion and expertise drew him into a national and worldwide effort to eradicate venereal diseases. Prevention and treatment of STDs was a focus of military medicine in the U.S. and Europe during the world wars. In 1930, as a lecturer in Public Health Administration of the Johns Hopkins University School of Hygiene and Public Health, he taught the first venereal disease control course offered at Johns Hopkins. Leaving Johns Hopkins in 1932, Turner joined the Rockefeller Foundation's International Health Division (IHD), where, he directed a study of Yaws in Jamaica and conducted research at the IHD laboratories in New York City. He returned to Johns Hopkins in 1936 to oversee the development of a program in Venereal Disease Control to train public health officers and future physicians in charge of local, state, and national programs. The program also offered training to physicians of the Armed Services during World War II. In 1939, Turner was named professor and chairman of the department of bacteriology in the school of hygiene and public health. As chair of the department from 1939 to 1957, Turner helped to advance the use of basic science in public health. He succeeded in making the department of bacteriology a robust research entity

with strong connections to many others at Johns Hopkins. The department of bacteriology was renamed the department of microbiology in 1952 and was made a joint department with the school of medicine in 1957. During the 1930s and 1940s, Turner and his colleagues made important research contributions to syphilis and the treponematoses. Turner's own research interests focused primarily on the investigation of immunity in syphilis. He received funding from the U.S. Public Health Service, the Rockefeller Foundation, and the Baltimore City Health Department for syphilis research. In 1939, Turner discovered a treponemal immobilization (TPI) antibody. Later a colleague in his lab discovered that this antibody was uniformly present in patients with untreated syphilitic infection. The TPI test became an essential tool for determining accurate rates of syphilis infection and eliminating false positives. Turner identified the optimal conditions for preserving (freezing and thawing for use) spirochetes outside an animal host, allowing scientists to conduct experiments on strains over time. He was also highly regarded for the methods and practices he developed for prevention and control of syphilis. The training program he led at the school of hygiene and public health involved clinical case work, serology in the lab, and epidemiological fieldwork. Turner taught key methods and goals of a syphilis control program, particularly the need to treat both latent and active infections to prevent the spread of disease. From 1940 to the early 1950s, Turner served on major national research advising and funding committees including the Syphilis Study Section of the National Institutes of Health and as Chair of the National Research Council's Subcommittee on Venereal Diseases. In 1950, the Treponematoses Laboratory Center, a consulting laboratory for the World Health Organization and the center of a world-wide attack on diseases caused by spirochetes, began operating at the Johns Hopkins University School of Hygiene and Public Health under Turner's direction.

Starting in 1942, Turner served in the Army Medical Corps, attaining the rank of Colonel. As consultant to the Surgeon General of the Department of the Army, he led the Army's syphilis eradication program, serving as Director of the Venereal Disease Control Division. With the beginning of World War II, high rates of syphilis among recruits revived fears from World War I that venereal disease would impede the fighting effectiveness of the armed forces. Turner rejected the Army policy on abstinence as the major mode of venereal disease control and approved the massive distribution of condoms among troops at the rate of up to 50 million per month throughout the war. Turner also authorized large-scale advertising campaigns aimed at convincing soldiers to protect themselves by using condoms or getting prophylactic treatment soon after having sex. However, he had to fight widespread opposition from those who believed his programs encouraged promiscuity. Under Turner's leadership the Army achieved the lowest wartime incidence rate of venereal disease among soldiers ever recorded. He was awarded the U.S. Army Legion of Merit for his achievements in preventing syphilis among U.S. servicemen and among civilians in the U.S. and occupied Europe.

From the late 1940s onwards Turner began to shift the focus of his research from syphilis to polio. He collaborated with David Bodian and Howard Howe on their research that identified the three immunological types of poliovirus which explain why previous vaccines against a single strain had failed. The National Foundation for Infantile Paralysis appointed Turner to several key committees, the most important of which was the Virus Research and Epidemiology Committee that oversaw research dealing with poliovirus and with vaccine development. Turner was one of seven members of the National Foundation for Infantile Paralysis Advisory Committee that approved the Salk vaccine as safe to test in clinical trials in 1954, which led to the successful prevention of polio in millions of children.

Named professor of medicine in 1951, Turner became the eighth dean of the school of medicine in 1957 and held the office until 1968. A remarkably effective administrator, Turner worked to increase communications within the school of medicine, between the school of medicine and the hospital, and between the medical institutions and the university. During his tenure the school of medicine underwent its greatest expansion in its history up to that point. The school received a record amount of federal government grants and contracts; its endowment funds doubled and its annual operating budget increased five-fold. The school also doubled its physical plant, added new departments, increased enrollment, and tripled its faculty. As dean, Turner advocated that admission criteria be based on merit and not restricted to any group of persons. In 1963, the first African American students were admitted to the school of medicine.

Turner participated in many scientific and policymaking groups in the health fields and received many tributes for his achievements. In 1966 the University of Maryland conferred upon him an honorary degree of Doctor of Science and in 1968 the University's Medical Alumni Association presented Turner with the Gold Key and Honor Award for outstanding contributions to medicine and distinguished service to mankind. That same year the Johns Hopkins University School of Medicine named its new auditorium in his honor. In 1969, the American Social Health Association (ASHA) awarded Turner, who had played a leadership role at ASHA, their highest tribute, the William Freeman Snow Award for Distinguished Service to Humanity. In 1991 Johns Hopkins University awarded Turner an honorary doctorate of humane letters.

Turner was passionate about medical education, the history of medicine, and The Johns Hopkins University. He had been active in early efforts to establish comprehensive healthcare programs for residents of the immediate community of East Baltimore. He considered Johns Hopkins' most important role was as a world leader in advancing medical research and medical education. After leaving the dean's office, he was named the first archivist of the Johns Hopkins Medical Institutions. While serving as archivist he implemented an archival program and wrote a history of the Johns Hopkins Medical Institutions, *A Heritage of Excellence*. In 1982, he stepped down as archivist to head the newly-formed Alcoholic Beverage Medical Research Foundation.

Turner was affiliated with Johns Hopkins for 75 years. He published over 90 articles and seven books, including a memoir that offers an intimate portrait of medicine at Johns Hopkins during the first half of the twentieth century. Turner cultivated an important and extensive network. At the time that he became Dean of the school of medicine, he had personally known every previous Dean except for William Osler. He remained active at the University as an emeritus professor up until his death at the age of 100 on September 22, 2002.

Chronology: 1927-1931, 1936-1946, 1962-1999 - Johns Hopkins Hospital
1927-1932, 1936-2002 - Johns Hopkins University School of Medicine
1930-1932, 1936-1962 - Johns Hopkins University School of Hygiene and Public Health

Scope and Content:

The Thomas B. Turner Collection documents the role Turner played as an expert in treponemal diseases, including his research, treatment, and training of personnel in the field, at a significant moment in the history of these diseases. It also documents the administrative role Turner played in the medical institutions at Johns Hopkins from the 1940s up through the 1960s, particularly as dean of the school of medicine. The collection contains records from the Microbiology Department of the School of Hygiene and Public Health and School of Medicine where Turner taught and conducted research.

Collection records document efforts beginning in the mid-1930s by Turner and his colleagues at Hopkins and elsewhere to study, diagnose, and treat spirochetal diseases, particularly syphilis and yaws. Early documents and photographs pertain to Turner's work at the International Health Division of the Rockefeller Foundation to study and control Yaws in Jamaica during the mid-1930s. There are papers pertaining to establishing the Venereal Disease Training Program at the Johns Hopkins University School of Hygiene and Public Health that was the first of its kind in the country. Collection reports, meeting minutes, notebooks, photographs and correspondence bear on issues related to coordinated efforts to improve knowledge and control over these diseases: the identification of venereal disease control problems, early drug clinical trials and clinical treatments, animal laboratory experiments, studies of untreated syphilis, the control of sexually transmitted diseases at the front during wartime, efforts to measure incidence and prevalence of syphilis in the urban center of Eastern Baltimore City, and international collaboration to identify, diagnose, and develop treatments.

Letters and reports provide detailed accounts by members of the U. S. Army Surgeon General's staff during WWII of responses to the problem of sexually transmitted diseases particularly syphilis and gonorrhea. They show how Turner, as the Director of the Armed Service's Venereal Disease Control Division, under the direction of the Surgeon General and along with other faculty consultants, sought to overturn army policies that penalized soldiers who contracted such diseases. They pursued strategies for gathering and disseminating information, including tours of clinics and recreation sites in the U. S. and theaters of war as well as soldier education campaigns. Subjects covered in these materials include challenges to and methods of diagnosis, prophylactic stations, difficulty in treating soldiers in the field, the increasing collaboration at the time among military and civilian authorities, and chemical (drug) treatments. While penicillin had been shown to be effective in the treatment of gonorrhea by 1943, supplies of the drug were too limited for its use on a large scale. Penicillin was not the treatment of choice for syphilis until 1944.

This collection further documents a large scale effort during the 1940s and 1950s to improve medical services worldwide. A longstanding consultant to the U. S. Army and the World Health Organization (WHO), Turner received copies of reports by fellow physicians working as consultants to the military in the theaters of operation in Europe, North Africa, the Far East, and Latin America. These reports address the contributions of and conditions for medical personnel working in hospitals in various countries. Records document the orientation and momentum during the final years of world war II and its immediate aftermath toward improving social conditions and promoting health and future peace. Such efforts focused on education, the establishment of new organizations, such as UNESCO, new treatments, distributions of scale, and the coordination of resources from countries, especially the U.S., already mobilized for international war. Related noteworthy materials pertain to the establishment at Johns Hopkins University School of Hygiene and Public Health of the International Treponematoses Laboratory Center, a joint endeavor with the WHO. There are also research records pertaining to tetanus and polio vaccination studies.

Turner had important longstanding affiliations with the Rockefeller Foundation , the National Research Council (NRC), U. S. Public Health Service (USPHS), the World Health Organization (WHO), the National Foundation for Infantile Paralysis (NFIP), the American Social Health Association, and as an alumnus and member of the Board of Visitors and Governors of St. John's college.

There are also many documents pertaining to Turner's extensive role in shaping administrative policies at Johns Hopkins School of Medicine. These include meeting minutes and notes from numerous committees on which Turner sat and chaired, as well as documentation from Turner's meetings and correspondence during his deanship with the school's faculty and top administrators.

This collection also contains materials brought together by Turner in order to document the history of the Johns Hopkins University medical institutions. These materials include, among others, correspondence and many newspaper clippings. Turner's ideas about medical education and training, particularly medical school, are also well documented in his papers. Related materials include committee meeting materials, news clippings, scripts of speeches, and records pertaining to publications by Turner.

Collection materials include documents, photographs, and a small set of artifacts.

Series 1: Biographical and Personal Files - 1931-1932; 1900; 1909; 1941-2002; undated; 1934-1939; 1876

Scope and Content: Turner's biographical and personal files document his personal achievements and interests over the course of his career, including his interest in the history of The Johns Hopkins Medical Institutions. Materials in this series include numerous awards, biographical sketches, Turner's curriculum vitae, and bibliographies of his publications. There is correspondence pertaining to Turner's faculty appointments. There are many clippings that span a century, from newspapers and other periodicals, principally about Turner, medical education and research, public health issues, the history of medicine, and The Johns Hopkins University; its history, medical institutions, faculty, and executive administrators. There is a transcript of an interview with Turner in which he and other head administrators discuss the period during which Turner was the dean of the School of Medicine. There are also appointment books and a small set of Turner's notebooks.

Archival Arrangement: The seven sub-series within this series are arranged in alphabetical order by sub-series title. Folders within sub-series pertaining to Turner's awards, faculty appointments, and notebooks are arranged in chronological order by date. Folders in sub-series pertaining to biographical materials, clippings, finances, and the general files are arranged in alphabetical order by folder title.

Sub-series 1.1: Awards and Honors - 1943-1944; undated; 1959-1960; 1994; 1996-1997; 1955; 1989-1992; 1987; 1976-1977; 1999-2002; 1946-1948; 1952; 1984-1985; 1965-1970; 1974; 1980-1982

Extent: 32 folders

Scope and Content: Materials document numerous awards and honors received by Turner for his contributions over the course of his lifetime. The majority are dated from the 1960s onward. Materials include correspondence with colleagues and friends; copies of speeches; event programs; and newsletter and magazine articles and newspaper clippings. Turner was listed in biographical reference serials and magazines about distinguished individuals including Who's Who. He was the recipient of several notable awards including the Legion of Merit awarded by the U. S. Army Surgeon General, honorary doctorate degrees from the University of Maryland and Johns Hopkins University, and the American Social Health Association William Freeman Snow Award for distinguished service to humanity. The Turner auditorium at the Johns Hopkins School of Medicine was named in his honor.

Series 2: Correspondence Files - 1930-2002; 1876

Scope and Content: The correspondence files in this collection reflect the impressive scope of Turner's professional and social network and his influence both locally and internationally. Correspondents include top administrators at Johns Hopkins University; medical researchers from around the world; leaders of international organizations, scientific associations, clubs, and the U. S. government, including army personnel; and local politicians in Maryland and Baltimore. These files include a mix of personal and professional correspondence. Turner exchanged news with colleagues updating each other on family, health, deaths, travels, speaking engagements, publications, co-authored papers, promotions, and other collaborations. Letters with family and business associates pertain to family health, education, business, and recreation. There are also letters between Turner and colleagues during World War II that include detailed descriptions of wartime conditions and medicine in different theatres of operation. Research related correspondence pertain to various fields of medicine, principally treponemal diseases. Turner and colleagues around the world shared information on strains of treponemes maintained in laboratories. Letters discuss shipping specimens of patient's blood sera and animals infected with spirochetal diseases to Turner for testing and evaluation, as well as requests that Turner send animals (usually rabbits) infected with disease to their laboratories. Several letters refer specifically to the Treponemal Immobilization Test. There are discussions of the testing of poliomyelitis vaccines and letters about tetanus toxin. There are also letters about patients including discussions of treatment. Additionally, there are letters regarding Turner's work on the impact of alcohol consumption on health. There are many discussions between Turner and colleagues at Johns Hopkins University about the school of public health and school of medicine on a wide range of topics including, the Venereal Disease Training Program at the school of public health, the department of bacteriology, medical education, and research at Johns Hopkins during world war II. Material types include letters and accompanying documents such as papers, published articles, bibliography, curricula vitae, and newspaper clippings.

Archival Arrangement: Correspondence files are divided into sub-series, one for each letter of the alphabet. Folders are organized within sub-series in alphabetical order by the last name of the person with whom Turner exchanged letters. In some cases the "correspondent" is an institution or the subject of the letters. Within folders, documents are arranged in

chronological order by date.

Conditions Governing Access Element: This Series has been Screened by LK for PHI and CI.

Related Archival Materials Element: Correspondence pertaining to research are also located in the research files series and the external institutional affiliations series of the Turner Personal Papers Collection.

Series 3: Johns Hopkins Institutional Affiliations - 1887; 1925; 1890-1891; undated; 1931-1932; 1909; 1934-1935; 1915-1916; 1905; 1937-2003; 1894; 1900-1901; 1929; 1937-2003; 1918

Scope and Content: Until the early 1950s Turner's primary affiliation was within the School of Hygiene and Public Health as Professor of Bacteriology, later called Microbiology, and as Director of the Training Program in Venereal Disease Control. Microbiology became a joint department across both schools and by the late 1950s Turner's principle affiliation had shifted to the School of Medicine, as professor of Microbiology and Dean of the school for eleven years. The bulk content of this series pertains to Turner's administrative roles on advisory boards and committees and with budgetary and curriculum development in both schools. Turner was also an early force for documenting the history of medicine and medical contributions at the Johns Hopkins medical institutions prior to and during his role as the medical institutions' first archivist.

Archival Arrangement: Institutional records are organized by Johns Hopkins entity and school.

Related Archival Materials Element: See also Turner's correspondence files for more letters between Turner and colleagues pertaining to Turner's work in the School of Hygiene and Public Health and School of Medicine as a faculty member, researcher, and administrator.; See also Turner's research files for materials pertaining to Turner's research as a faculty member in the School of Hygiene and Public Health.

Sub-series 3.4: Multiple Johns Hopkins Institutions - 2001; undated; 1946-1985; 1939; 1988-1999; 1905

Scope and Content: These materials were generated in the course of administrative planning, activities, and programs that entail cooperation among more than one medical institution at Johns Hopkins. As a whole, they include materials pertaining to the Johns Hopkins Hospital, School of Public Health, and School of Medicine. Documents pertain to committee work, funding and financing, the Johns Hopkins Medical Society, and community outreach, specifically, the Columbia Project.

Archival Arrangement: The records in this sub-series are divided into four sub-sub-series.

Sub-sub-series 3.4.1: Columbia Project and East Baltimore Files - 1964-1971; 1939; 1946; 1973-1974; undated

Scope and Content: The Turner Collection contains materials pertaining to Johns Hopkins role in a community healthcare project commenced during the 1960s to develop programs in comprehensive, prepaid health care in the then developing city of Columbia in Howard County, Maryland. The project's mission was to provide a full spectrum of medical services to residents of the Baltimore-Washington corridor, particularly Columbia City. A tacit objective was also to study the delivery of quality medical care to a community. The Columbia Project was one of three comprehensive health care programs approved in April 1967 by the advisory board of the Johns Hopkins School of Medicine and the medical board of the Hospital. The other two included one for the Johns Hopkins University faculty and dependents and one for residents living in the vicinity of the hospital in East Baltimore. The Columbia project was supported by grants from the federal government. Johns Hopkins provided the medical services including in-and out-patient services, physicians from the Johns Hopkins medical school and Johns Hopkins Hospital, and resident training and medical facilities, principally a hospital. A foundation, Columbia Medicine, was originally set up as the policy making organization and was to comprise equal participation by members on its Board of all three, Johns Hopkins, Group Health Association, and Community Research and Development. A Health Services Committee was established at Johns Hopkins in 1967, chaired by Kerr L. White, to deliberate upon the Columbia project as well as related areas, including East Baltimore. This committee reviewed the feasibility of the project, sources of financial support, and the programs' educational and research impact. The committee drafted and submitted reports to the Medical Planning and Development Committee. The Healthcare Programs Working Committee was formed in 1968, chaired by Robert Heyssel, to gather information, develop plans, and make

recommendations for the new health care programs at Hopkins. Dr. Turner, in his role as dean of the Johns Hopkins University School of Medicine, worked on the development of the Columbia comprehensive plan along with Russell Nelson.

Documents cover the early planning stage onward. They include correspondence and memoranda, meeting minutes, hand written notes, and drafts of proposals and reports. Documents contain detailed information about the project in its planning stage and about Columbia City. While the bulk of documents pertain to the Columbia project, many also pertain to plans for East Baltimore and for providing health care to Johns Hopkins faculty.

Archival Arrangement: Materials in this sub-sub-series are arranged in alphabetical order into the following groupings: committees, correspondence and memoranda, news clippings, newsletters, notes, organizational charts, pamphlets, reports and proposals, and reprints. Sub-series 3.5: School of Hygiene and Public Health (SHPH) - 1998; undated; 1968; 1915-1916; 1944-1958; 1929; 1973; 1931-1932; 1971; 2000; 1894; 1934; 1966; 1887; 1937-1941; 1989; 1918; 1992-1995

Scope and Content: On September 19, 1936, Turner was transferred from the Rockefeller Foundation International Health Division laboratories to the Johns Hopkins University School of Hygiene and Public Health in order to teach public health students in syphilis control, conduct epidemiological studies of syphilis in the Eastern Health District, and conduct laboratory studies.

By 1948, the Department of Bacteriology had four principal functional divisions with a senior staff member as the key person in each division; the four included: problems pertaining to bacterial diseases; viral diseases; spirochetal diseases; and the application of immuno-chemical techniques and principles to the study of infectious diseases. The division concerned with spirochetal diseases was under Turner's immediate supervision and was concerned primarily with the immunological problems in syphilis and other treponemal diseases and with attempts to cultivate virulent *T. pallidum* in vitro.

Turner was a faculty member of the Department of Bacteriology and the Department's Director until 1957. In 1952, the Department of Bacteriology was renamed the Department of Microbiology.

Archival Arrangement: Turner's SHPH records are arranged into seven sub-sub-series.

Related Archival Materials Element: Documents pertaining to Turner's research conducted at the School of Hygiene and Public Health are located in the Research Files Series.

Sub-sub-series 3.5.1: Advisory Board Files - undated; 1887; 1932; 1951-1957

Scope and Content: Turner was a member of the School of Hygiene and Public Health Advisory Board until he resigned in June 1957. Advisory Board materials include: correspondence and memoranda; meeting agendas and minutes; meeting schedules; financial statements, charts, and graphs; committee reports; CVs of newly appointed faculty and faculty under consideration for promotion; faculty evaluations and recommendations for promotion; obituaries of advisory board members; and policy statements from the JHU President. There is also one negative of a rabbit goiter.

Archival Arrangement: Advisory Board records are arranged in chronological order by year, and within folders, by document date.

Folder 3.5.1.001 - 3.5.1.009: Advisory Board Meetings - 1951-1957; 1887; 1932; undated

Extent: 9 folders

Scope and Content: Among these materials is one negative.

Sub-sub-series 3.5.2: Committee Files - 1894; Circa 1915-1916; 1918; 1940-1941; 1944-1957; undated

Scope and Content: Turner served on several School of Hygiene and Public Health committees and was the chair of many that deliberated policies regarding institutional organization and planning, medical education, and curriculum.

Committee materials include: correspondence and memoranda; meeting agendas and minutes; proposals and reports; course schedules and descriptions; financial statements; lists of faculty; faculty curricula vitae; notes; copies of papers and publications; school catalogues; and tables and diagrams.

Archival Arrangement: Committee records are arranged alphabetically by committee name. Within folders, documents are arranged in chronological order by date.

Sub-series 3.6: School of Hygiene and Public Health (SHPH) and School of Medicine (SOM) joint Microbiology Department - 1953-1962; 1947-1948

Scope and Content: Materials include documents pertaining to the establishment of a joint department of Microbiology in the SOM and SHPH. The name and location of the Department of Microbiology has changed over time. Until 1951, in the SHPH there was a Department of Bacteriology which in 1952 was renamed the Department of Microbiology. Until 1953, in the SOM there also was a Department of Bacteriology which in 1954 was renamed the Department of Microbiology. From 1954 until 1957 both the SHPH and the SOM each had a Department of Microbiology. In 1957, the Department of Microbiology was made a joint department in the SHPH and the SOM. It remained a joint department until 1962. From 1963 onward the Department of Microbiology resided only in the SOM. Turner was a faculty of the department in both the School of Hygiene and Public Health (SHPH) and the School of Medicine (SOM). From 1939 until 1962 Turner was a professor in the department in the SHPH and he was Chair of the Department from 1939 until 1957. From 1951 until he retired he was a professor in the department in the SOM. From 1968 until his death he was professor emeritus of the department of the SOM.

Sub-series 3.7: School of Medicine (SOM) - undated; 1952-2003; 1944-1945

Scope and Content: This sub-series consists mostly of administrative records, including committee and advisory board records, as well as faculty files. Some of the documents are dated from before Turner's deanship; some were produced by Turner in the course of his work as Dean of the School of Medicine from 1957 to 1968; many comprise materials dated after he stepped down as Dean in 1968. Records include an inventory of the School of Medicine Dean's records created by staff of the Chesney Medical Archives. There are materials pertaining to the School of Medicine survey by the AMA for accreditation in the fall of 1957. There are typescripts of papers, notes, meeting materials and related documents pertaining to the following: admissions to

the school, revision of the program of medical education, the full-time faculty system, and the relationship between the medical institutions at Johns Hopkins during a period of rapid growth and change.

In addition to his professorship in the Department of Microbiology, serving as dean of the medical school, and serving on many committees, Turner played an important role in several medical school projects. In 1960, he persuaded the Commonwealth Fund to support three exchange programs that were patterned after Guy's Exchange in London, England. They were with the American University in Beirut, Lebanon; the University College in Ibadan, Nigeria; and Cayetano Heredia in Lima, Peru. This program, which is not well documented in Turner's papers, ended within a period of three years due to civil strife in each country. Turner established and secured funding for the Daniel Coit Gilman Lectureship. He also headed a newly established research foundation on alcohol and health for which there is a small set of records in this sub-series.

Archival Arrangement: Records in this sub-series are grouped into eight sub-sub-series.

Related Archival Materials Element: See also the institutional records of The Johns Hopkins University School of Medicine, Record Group 3, Office of the Dean of the Medical Faculty, Thomas B. Turner for records created by Turner during his tenure as dean from 1957 to 1968.

Sub-sub-series 3.7.1: Advisory Board of the Medical Faculty - Files - 1974; 1954; 1991; 1969; 1972; 1959-1962

Scope and Content: Most of these records were created during Turner's tenure as dean of the medical School. They comprise materials pertaining to Advisory Board meetings, including meeting agenda, minutes, Turner's notes, and supporting papers. The minutes include a report by the Dean. Supporting documents include, among other things, announcements by the president; correspondence and memoranda; the academic calendar for the coming year; lists of faculty appointments and faculty CVs; committee reports; lists of funding institutions and grants applied for and received by the School of Medicine; as well as statistical information about fluctuations in numbers of students and faculty over time. Records include a typescript of Turner's remarks at the 1000th meeting held on March 27, 1991.

Archival Arrangement: Folders are arranged in chronological order by date of Advisory Board meeting.

Conditions Governing Access Element: Contains confidential personnel information and confidential student information: correspondence recommending faculty for promotions and student records, including student grades.

**Sub-sub-series 3.7.2: Alcoholic Beverage Medical Research Foundation (ABMRF) Files -
1981-1990; 1998**

Scope and Content: In 1982 Turner stepped down as archivist for the medical archives in order to head the newly formed Alcoholic Beverage Medical Research Foundation that was based at Hopkins. This was a joint project of the U.S. Brewer's Association (USBA) and the Brewer's Association of Canada; these organizations provided the foundation's budget. The Foundation issued studies about alcohol and health. Their mission was: "to contribute new knowledge toward the prevention of alcohol misuse and alcoholism and to monitor the safety of alcoholic beverages." This foundation included researchers and staff members from five countries: the U. S., Canada, Great Britain, Australia, and New Zealand. Materials include a copy of the articles of incorporation, correspondence, news articles, personnel files, and press releases.

Scope and Content: The Pithotomy Club, the oldest student group at Johns Hopkins University, had the official name of the Society of Pithotomists of the Medical Department of The Johns Hopkins University.

Folder 3.7.7.084: A Proposal for Experimentation in Post Graduate Medical Education at Five Medical Schools by John C. Beck, Halsted Holman, Julius R. Krevans, Austin Weisberger, and James Wyngaarden - undated

Extent: 1 folder

Folder 3.7.7.085: Reflections on The Johns Hopkins Medical Institutions in mid century by Thomas B. Turner, M.D. - circa 1959; 1961; 1971; 1973-1974

Extent: 1 folder

Scope and Content: This was a documentary film about Turner's deanship. Documents include drafts of sections of the film transcript, notes, outlines, and correspondence. The bulk of the documents are dated 1971.

Folder 3.7.7.086: Regional Medical Program for Maryland for Heart Disease, Cancer and Stroke - Correspondence - 1967

Extent: 1 folder

Scope and Content: Turner was the Coordinator for the Regional Medical Program for Maryland.

Folder 3.7.7.087: School of Medicine Correspondence and Memoranda - 1969-1971; 1949; 1964-1966; 1981-1984; 2001; 1962; 1975-1978; 1993-1994

Extent: 1 folder

Scope and Content: Correspondents include: Carl H. Albers, Robert R. Dawson, R. C. Derbyshire, Richard P. Longaker, Stanley Mazaroff, Donald J. McEvoy, Victor McKusick, Russell A. Nelson, David E. Rogers, Richard S. Ross, Stephen A. Snyder, Henry M. Seidel, John H. Yardley, and Jackie Yutzi.

Includes a paper by Turner, "Three Vexing Problems Confront Medical Education Today."

Folder 3.7.7.088: School of Medicine Dean's Centennial Symposium, June 10, 1993 - 1992-1993

Extent: 1 folder

Folder 3.7.7.089: The Stanhope Baynes-Jones Lectureship - Inaugural Lecture Program - 1968

Extent: 1 folder

Folder 3.7.7.090: Stationery - 1999

Extent: 1 folder

Folder 3.7.7.091: Ten-Year Development Program for the School of Medicine (Paper) - 1960

Extent: 1 folder

Folder 3.7.7.092: Turner Auditorium - 1988; 1968; 1985; 1970-1972; 1974

Extent: 1 folder

Folder 3.7.7.093: William H. Welch Endowment for Clinical Education and Research (News Release) - 1914

Extent: 1 folder

Sub-sub-series 3.7.8: Student and Advising Files - undated; 1997-1999; 1982-1984; 1974-1980; 1986-1989; 1992-1994; 1970-1971

Scope and Content: Materials include application materials; correspondence; rosters of students and student appointments; statistics and tables.

Archival Arrangement: Folders are arranged in alphabetical order by title, usually by student's surname.

Folder 3.7.8.001: Applications Related Correspondence, Charts, and Lists - 1987; 1975-1976; 1978

Extent: 1 folder

Folder 3.7.8.002: Callahan, Bryan - 1993-1994

Extent: 1 folder

Scope and Content: Student in the JHU Department of History.

Folder 3.7.8.003: Internship and Residency Appointments (lists) - 1971; 1975

Extent: 1 folder

Folder 3.7.8.004: Letters of Reference Correspondence - 1997; 1978-1980; 1999; 1982-1984; 1988-1989; 1974; 1992-1994; 1986

Extent: 1 folder

Scope and Content: Letters are arranged in alphabetical order by student's surname.

Folder 3.7.8.005: Pelis, Kim - 1993

Extent: 1 folder

Folder 3.7.8.006: Student Applicants - Interview Correspondence and Notes - 1970; 1978; 1984; undated; 1974; 1976

Extent: 1 folder

Folder 3.7.8.007: Student Correspondence - undated; 1998-1999; 1974; 1983

Extent: 1 folder

Folder 3.7.8.008: Taylor, Noel - 1978-1979

Extent: 1 folder

Folder 3.7.8.009: Willoughby, Rodney E. - 1979-1980; 1977

Extent: 1 folder

Sub-series 3.8: Welch Medical Library - 1979; 1968-1977; 1987-1988; 1984-1985

Scope and Content: Materials comprise correspondence, mostly, pertaining to The Johns Hopkins University Institute of the History of Medicine, Medical History Club, and Advisory Editorial Board for the Bulletin of the History of Medicine. Turner was a member of the Advisory Editorial Board of the Bulletin of the History of Medicine, the journal of both the American Association for the History of Medicine and The Johns Hopkins Institute of the History of Medicine. He was also president of the Medical History Club.

Folder 3.8.001: Ex Libris, Vol. VI, No. 3, October 1984 - 1984

Extent: 1 folder

Folder 3.8.002: The Johns Hopkins University Institute of the History of Medicine - 1987-1988; 1968-1977; 1985; 1979

Extent: 1 folder

Series 4: Research Files - 1929-1973; undated; 1993

Scope and Content: The bulk of Turner's Research records pertain to studies conducted by Turner and his colleagues on Treponemal Diseases. From the late 1930s until the late 1950s, under the direction of J. Earle Moore, Thomas Turner and others, The Johns Hopkins University School of Public Health was an important center for research on treponemal diseases with a focus on syphilis. Collection materials include notebooks from Turner's laboratory research on animals; records pertaining to research conducted on rates of syphilis in East Baltimore; and documents pertaining to a collaborative project between JHU and the World Health Organization for the study and eradication of Treponemal Diseases. There are also a smaller set of materials pertaining to research conducted by Turner and colleagues on other medical conditions, including, among others: polio virus and vaccination, the pathogenesis of tetanus and tetanus immunization, diphtheria, and influenza and the common cold. Materials include research bibliography; research notebooks, notes, and charts; research related correspondence; budgets; and research project proposals and reports to grant funding agencies.

Archival Arrangement: Research records have been arranged into four sub-series.

Related Archival Materials Element: See also sub-series 3.6 SPH & SOM-joint Department of Microbiology, folder 3.6.001 "Annual Reports" that pertains to funding organizations (N.I.H., Whitehall Foundation) and research studies conducted by Turner and his colleagues at the School of Medicine.

Sub-series 4.1: Research Bibliography - undated

Scope and Content: Documents in this sub-series comprise two shoeboxes of index cards with citations, abstracts, and descriptive notes on published works about a wide range of medical topics including, among others, spirochetal diseases and viruses. There is also one folder with citations about yaws.

Archival Arrangement: Index cards are arranged in alphabetical order by medical condition.

Unit 4.1.001: Medical Conditions, Studies, and Treatments, A-Z by subject I - undated

Extent: 1 3x5 shoebox

Unit 4.1.002: Medical Conditions, Studies, and Treatments, A-Z by subject II - undated

Extent: 1 4x6 shoebox

Folder 4.1.003: Yaws Journals 1991-1994 Literature Search Results (list)

Extent: 1 folder

Sub-series 4.2: Research Correspondence - 1957; 1965-1973; 1960; 1947-1955; undated; 1939-1941

Scope and Content: Records comprise correspondence and reports pertaining to Turner's research projects.

Archival Arrangement: Correspondence folders are arranged in alphabetical order by correspondent's surname.

Related Archival Materials Element: Sub-series 3.7 SOM, folders 3.7.6.003 - 3.7.6.005, "Budgets" and folder 3.7.6.009 "Expenses" also contain research-related correspondence.

Folder 4.2.001: Csonka, George W. - 1954

Extent: 1 folder

Folder 4.2.002: Fisher, Russell S., Chief Medical Examiner of Maryland - Correspondence Regarding a Study of Sudden Deaths in Infants - 1950

Extent: 1 folder

Folder 4.2.003 - 4.2.004: George Moffet and the Whitehall Foundation, Inc. - 1948-1955; 1967-1973

Extent: 2 folders

Scope and Content: Correspondents include: H. L. Callender, Douglas Colman, Robert (Bob) Delhamer, Thomas Francis, Paul H. Hardy, Howard A. Howe, Donna Hunt, John S. Lancaster, George M. Moffett, J. Earle Moore, Charles Quandt, J. R. Rhamstine, Lowell J. Reed, Albert B. Sabin, Irene Skop, E. L. Stebbins, Robert Stinson, and John M. Weir.

Folder 4.2.005: Goodpasture, W. Carter - 1947

Extent: 1 folder

Folder 4.2.006: Hoffmann-LaRoche, Inc. - 1955

Extent: 1 folder

Scope and Content: Correspondents include William (Bill) A. Davis.

Folder 4.2.007: Lederle Laboratories Division - 1957; 1953-1955

Extent: 1 folder

Scope and Content: Correspondents include Henry S. Baker, Benjamin W. Carey, I. S. Danielson, Paul H. Hardy, Stanton M. Hardy, Albert L. Lehninger, and H. D. Piersma.

Folder 4.2.008: National Research Council (NRC), Committee on Growth - American Cancer Society Fellowship Program - 1953-1954

Extent: 1 folder

Scope and Content: Correspondents include Charles E. Richards.

Folder 4.2.009: Radioactive Pharmaceuticals - 1954

Extent: 1 folder

Scope and Content: Correspondents include Dalitta P. Sislian and Donalee L. Tabern.

Folder 4.2.010: Research Application Review - undated

Extent: 1 folder

Folder 4.2.011: The Rockefeller Foundation, International Health Division - Other Field Studies - 1945; 1947

Extent: 1 folder

Scope and Content: Correspondence pertaining to potential research on pinta (Mexico) by Turner forms the bulk of these letters. Some letters also refer to research on syphilis in San Joaquin, California. Correspondents include Wilbur G. Downs, Robert (Bob) Dyar, and Hugh H. Smith.

Folder 4.2.012: The Rockefeller Institute for Medical Research - John Kidd - 1939-1941

Extent: 1 folder

Folder 4.2.013: Rockefeller Institute for Medical Research - Polio - 1945-1946

Extent: 1 folder

Scope and Content: Correspondence regarding research about poliomyelitis. Correspondents include Francis O. Holmes.

Folder 4.2.014: Unidentified Correspondents - 1960

Extent: 1 folder

Folder 4.2.015: The Upjohn Company - 1955

Extent: 1 folder

Scope and Content: Correspondents include Arnold C. Ott, Ernest L. Stebbins, and Harold (Hal) A. Tucker.

Folder 4.2.016: U. S. Department of Health, Education, and Welfare, Center for Disease Control (CDC) - Correspondence - 1957

Extent: 1 folder

Scope and Content: Correspondents include William J. Brown and E. Ellen Nell.

Folder 4.2.017: U. S. Public Health Service (USPHS), Cancer Research Grants - Correspondence - 1948

Extent: 1 folder

Scope and Content: Correspondents include J. R. Heller, Manfred M. Mayer, R. G. Meader, and Ernest L. Stebbins.

Folder 4.2.018: U. S. Public Health Service, National Institutes of Health (NIH) - correspondence - 1954-1955

Extent: 1 folder

Scope and Content: Correspondents include Leonard Karel and Harry G. Steinman.

Folder 4.2.019: World Health Organization (WHO) Correspondence (Oversize) - 1972; 1965-1967

Extent: 1 folder

Scope and Content: Includes correspondence with M. G. Candau, J. L. de Vries, and Thorstein Guthe.

Sub-series 4.3: Research Laboratory Notebooks, Notes, and Charts - 1963; undated; 1965-1973; 1945-1961; 1929-1942

Scope and Content: Materials include research notebooks, notes, and charts primarily pertaining to Turner's research on syphilis (bulk), yaws, and tetanus.

Archival Arrangement: Records are arranged into five sub-sub-series and within sub-series folders and notebooks are roughly in chronological order by date.

Sub-sub-series 4.3.1: Notes on Index Cards - undated

Archival Arrangement: Index cards are sorted by subject.

Unit 4.3.1.001: Achievements in Medicine at Johns Hopkins - undated

Extent: 1 3x5 shoebox

Scope and Content: Index cards sorted into three groupings, one set for JH SHPH, another for the JH SOM, and a third working list. Within these groupings they are in sub groupings by medical field (e.g., genetics). Cards contain a description of an achievement in medicine and the names of the persons responsible for the medical advancement. These may have been used for one of Turner's publications about the history of Johns Hopkins or for a document (list) he wrote titled, "Important Contributions by the Johns Hopkins medical Institutions to Knowledge Concerning Health and Disease," which is located in the SOM Advisory Board Correspondence.

Sub-sub-series 4.3.2: Notebooks - 1965-1973; 1938-1942; undated; 1946-1961

Archival Arrangement: Notebooks are arranged into three groupings: treponematoses and syphilis; tetanus; and Herpes. Within each, notebooks are arranged in chronological order by notebook number, which is roughly in date order.

Bound volume 4.3.2.001: Experiments I - Laboratory Experiments Notebook (oversize) - 1938-1939

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments performed on animals, mostly rabbits,

which are listed in an index on the first page. Experiments include, among others, protection tests in syphilis, new leptospira strains, survival of viruses and other organisms in a frozen state, immunological differences between recently isolated strains as well as between recently isolated strains and the Nichols strain.

Bound volume 4.3.2.002: Experiments I - Laboratory Experiments Notebook (Loose Papers) (oversize) - circa 1938-1939

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook 1 and transferred to a folder.

Bound volume 4.3.2.003: Experiments II - Laboratory Experiments Notebook (oversize) - 1939-1940

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments performed on animals, mostly rabbits, which are listed in an index on the first page. Experiments include, among others: cross immunity experiments between yaws and syphilis and cuniculi; immunological relationship between different strains of t. pallidum; the effect of normal and immune serum on T. Pallidum in vitro; efforts to improve the protection tests in syphilis; testing the effect of temperatures (freezing) on T. pallidum; the treatment of cuniculi infection with nearsphenamine; testing dried t. pallidum; and determining the duration of infectiousness of T. pallidum in stored blood. Includes a list of Turner's experiments on pages 291-295.

Bound volume 4.3.2.004: Experiments II - Laboratory Experiments Notebook (loose papers) (oversize) - circa 1939-1940

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook 2 and transferred to a folder.

Bound volume 4.3.2.005: Experiments III – Laboratory Experiments Notebook (oversize) - 1940-1941

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments performed on animals, mostly rabbits. Experiments that are listed in an index on page 1 include, among others: spirochete immobilizing and rabbit protection tests in syphilis; freezing and drying of serum containing spirochetes (yaws and syphilis); variations of procedure to improve sensitivity of in vitro test and testing blood from patients with early syphilis in rabbits; and transmission of syphilis by transfusion of stored human blood. Also includes hand drawn illustrations.

Bound volume 4.3.2.006: Experiments IV - Protection Tests in Syphilis – Laboratory Experiments Notebook (oversize) - 1940-1941

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments using human serum. Experiments, which are listed in an index on page 1, include in vitro tests and a summary of in vivo protection tests in syphilis.

Bound volume 4.3.2.007: Experiments Book V - Laboratory Experiments Notebook (oversize) - 1946-1949

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments performed on animals, principally rabbits, also on monkeys and mice. Experiments that are listed in an index on page 1 include, among others: immunization; the therapeutic efficacy of penicillin (G, F, K) in syphilis; increased infectivity; in vivo resistance and treponemidal antibody; treponemal immobilizing antibody; and development of immobilizing antibody after intracutaneous t. pallidum inoculation. Also Includes a diagram of the rabbit rooms.

Bound volume 4.3.2.008: Experiments Book V - Laboratory Experiments Notebook (loose papers) (oversize) - 1946

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook V and transferred to a folder.

Bound volume 4.3.2.009: Experiments VI - Laboratory Experiments Notebook (oversize) - 1948-1952; 1940; 1946; 1954-1955; 1938; 1957

Extent: 1 bound volume

Scope and Content: Hand written notes on experiments performed on small animals, mostly rabbits and hamsters. Experiments that are listed in an index on page 1 include, among others: cross immunity between leptospira and t. pallidum; immobilizing antibody among different strains of t. pallidum; effect of climate on reactions of host to infection; comparison of strains of treponemes (retrospectively and for strains from many different regions); susceptibility of small animals; penicillin prophylaxis; effect of cortisone and ACTH; and modification of t. pallidum by temperature. Includes an index of hamsters by disease.

Bound volume 4.3.2.010: Experiments VI - Laboratory Experiments Notebook (loose papers) (oversize) - undated

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook VI and transferred to a folder. Includes an index of hamster experiments by treponemal disease.

Bound volume 4.3.2.011: Animal Experiments on Syphilis with Mercury, Sulfa Drugs, Centrifuging, Freezing Albumin, Pressure, and Filtration (notebook) - 1941-1942

Extent: 1 bound volume

Bound volume 4.3.2.012: Strains of Treponemes Passed in Hamsters – Laboratory Notebook (oversize) - circa 1951-1954; 1959

Extent: 1 bound volume

Scope and Content: Hand written research notes about inoculating hamsters with sera from humans with treponemal diseases in order to transfer strains from region of origin to the laboratory at Johns Hopkins. Includes charts pertaining to the following areas: Haiti, Indonesia, Samoa, Bechuanaland, Iraq, Bosnia, Siam, and Jamaica. Also includes a list of strains passed in hamsters, country of origin, year, and disease with dates of 1912, 1939, and 1950-1954.

Bound volume 4.3.2.013: Experiments Book VII - Laboratory Experiments Notebook (oversize) - 1965-1973

Extent: 1 bound volume

Scope and Content: Hand written research notes (by Turner and another researcher or assistant) on experiments performed on rabbits, mostly, and also on mice. Experiments, some that are listed on an index on page 1, include, among others: study of latent syphilis; effects of various centrifugal forces on treponemes (including *T. pallidum*); *T. cuniculi* infection in rabbits; Stockholm agent; antibiotic therapy (including penicillin) on rabbits infected with *T. pallidum*; *T. pallidum* in mice including testing the effect of cortisone on experimental syphilis in the mouse; infectivity tests in rabbits and mice; and possible immunology of *T. pallidum*.

Bound volume 4.3.2.014: Experiments Book VII - Laboratory Experiments Notebook (loose papers) (oversize) - 1967; 1971-1973

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook VII and transferred to a folder.

Bound volume 4.3.2.015: Tetanus Book IV - Laboratory Experiments Notebook (oversize) - 1966; 1956-1961; 1968-1969

Extent: 1 bound volume

Scope and Content: Notes are recorded on the following experiments: the immunization of animals; rabbits inoculated with tetanus obtained from human patients in the Philippines; the presence of tetanus antitoxin; the titration of sera from patients with tetanus; the titration of sera, tissue, and organs extracted from rabbits and monkeys; and tests of tetanus antitoxin which had been in deep freeze for many years. Animals used in experiments include rabbits, monkeys, and mice and notebook contains detailed descriptions of the method of animal dissection. One reference is made to humans receiving tetanus antitoxin from horse serum and their reactions (page 215).

Bound volume 4.3.2.016: Tetanus Book V - Laboratory Experiments Notebook (oversize) - 1959

Extent: 1 bound volume

Scope and Content: Notes pertain to test tube experiments on *C. Tetani* cultures and toxin production of a strain of *C. Tetani* cultures.

Bound volume 4.3.2.017: Rabbits, Herpes II - Laboratory Experiments Notebook (oversize) - 1961-1963

Extent: 1 bound volume

Scope and Content: Hand written notes on rabbits inoculated with Herpes virus. Experiments include observations of differences in the condition of rabbits due to warm versus cold environmental temperature and the effect of the size of lesions produced by the subcutaneous inoculation of rabbits with eight different strains of herpes virus.

Bound volume 4.3.2.018: Rabbits, Herpes II - Laboratory Experiments Notebook (loose papers) (oversize) - undated

Extent: 1 folder

Scope and Content: Loose documents found folded inside Laboratory Experiments Notebook

"Rabbits Herpes II" and transferred to a folder.

Sub-sub-series 4.3.3: Strains of Syphilis and Yaws - 1930-1936; 1939; undated

Scope and Content: Hand written and typed notes pertaining to experiments performed on rabbits, mostly, mice, opossum, and other animals.

Archival Arrangement: The first set of folders pertains to syphilis and is arranged in chronological order by Turner's numbering system: S1, S2, etc. The second set of folders pertains to yaws and is arranged in alphabetical order by Turner's numbering system: yA, yB, etc.

Folder 4.3.3.001: Syphilis Strain S1 - Dead - 1932-1935

Sub-series 4.4: Research Studies - 1993; 1929-1970; 1972; undated

Scope and Content: The bulk of these records pertain to Turner's research on spirochetal infections including the categories spirochetal infections, treponemal diseases, syphilis, and yaws. They reflect distinct projects in Turner's research career. These include research conducted in Jamaica on yaws for the Rockefeller Foundation International Health Division; research at Turner's laboratory in the school of hygiene and public health (SHPH) on animals infected with syphilis virus; epidemiological research conducted in the Eastern Health District of Baltimore City; and research carried out in the SHPH at the International Treponematoses Laboratory Center under the auspices of the World Health Organization. There are also records pertaining to research on the common cold and influenza, diphtheria, infectious diseases, polio and tetanus, among others. Materials include correspondence; coding; grant applications; charts (test results); patient lists & patient test results; and reports (annual reports, reports to funding organizations, reports to committees).

Archival Arrangement: Research study records are arranged in ten sub-sub-series by medical condition and within these groupings folders are arranged in approximate chronological order by research project dates.

Sub-sub-series 4.4.01: Cancer - 1947-1948

Folder 4.4.01.001: Cancer Research - Manfred Mayer, Principal Investigator (JHSHPH), Funded by the National Research Council, Committee on Growth - 1947-1948

Extent: 1 folder

Sub-sub-series 4.4.02: Common Cold and Influenza - 1946-1959

Scope and Content: Turner facilitated research at the School of Hygiene and Public Health conducted by Thomas G. Ward, as the principle investigator, and colleagues on the common cold and influenza. These studies were funded by government grants from the U.S. Public Health Service and contracts with the U. S. Office of Naval Research. The titles of studies referenced in these documents include: "Studies on Virus Agents in the Common Cold;" "Study of Uptake

Radioactive Phosphorous by Certain Viruses;" "Characterization of Agents of the Common Cold;" "Antigenic Studies on Influenza Virus;" "Fundamental Studies on the Influenza Vaccine and Mechanism of its Action;" and "Studies on the Virus of Influenza."

Materials include correspondence, charts, contracts, grant applications and renewal, grant award statements, notes, patient test results, and reports. There are also correspondence regarding the formation of a Common Cold Institute (also called the Common Cold Foundation) in New York City. Its purpose would be to support studies on the common cold financed principally by industry. Turner agreed to serve as a member of the Scientific Committee of the proposed institute.

Folder 4.4.05.001 - 4.4.05.002: Studies on the Biology of Infectious Diseases – Whitehall Foundation, Inc. Grant - circa 1958-1964

Extent: 2 folders

Scope and Content: Processes studied include: the Treponematoses, other chronic disease processes, immune tissue reaction - hypersensitivity and allergy, tetanus, latent virus infections, and scientific manpower.

Folder 4.4.05.003: Final Report to the Whitehall Foundation, Inc. by Thomas B. Turner - circa 1959

Extent: 1 folder

Folder 4.4.05.004: A Comprehensive Study of Viral Hepatitis - Proposal by Ivan L. Bennett for Continuation of Research Contract with U. S. Army Medical Research Development and Command - 1964

Extent: 1 folder

Folder 4.4.05.005: Studies on the Biology of Infectious Diseases – Final Report to the Whitehall Foundation (draft), August 10, 1970 - 1967; 1970

Extent: 1 folder

Scope and Content: The Whitehall Foundation provided grants over a period of 20 years for research at Johns Hopkins on the biology of infectious diseases. This report, written by Turner, covers studies on treponematoses, tetanus, virus infections, enteric infections, and herpes.

Sub-sub-series 4.4.06: Poliomyelitis - 1947-1948; 1957; 1941

Scope and Content: A Study of the epidemiological aspects of Lansing Poliomyelitis in the Eastern Health District of Baltimore City was based primarily at the Family Clinic of the Johns Hopkins Hospital. This research, funded by a grant from the National Foundation for Infantile Paralysis (NFIP), was conducted from 1941-1942, discontinued during the war, and resumed in late 1946. It was a study of almost a thousand residents of Baltimore, about 90% of them children under 15 years of age, conducted by Turner and his associates: David H. Hollander, Sonia Buckley, U. Pentti Kokko, and Charles P. Winsor. There are also materials pertaining to immuno chemical studies of the polio virus that were funded by the NFIP. Materials include reports and charts.

Related Archival Materials Element: See also the External Institutional Affiliations files series, National Foundation for Infantile Paralysis, for materials pertaining to research on Lansing poliomyelitis in the Eastern Health District of Baltimore conducted at the Johns Hopkins Hospital.

Folder 4.4.06.001: Semi-annual Report Prepared on Studies Aided by a grant from the National Foundation for Infantile Paralysis - Epidemiological Studies of Poliomyelitis - 1941

Extent: 1 folder

Scope and Content: Report on 1) the study of poliomyelitis virus neutralizing antibodies in serum obtained from cases of poliomyelitis in the acute and convalescent stage of the disease and 2) the Distribution of neutralizing antibodies to the Lansing strain among residents of Baltimore City. Research was funded by the National Foundation for Infantile Paralysis. Report prepared by Turner.

Folder 4.4.08.01.002: Study of the Biology of Spirochetal Infections - Progress Report for E440 (C9), July 1 1953 - October 30, 1956, - 1956

Extent: 1 folder

Sub-sub-sub-series 4.4.08.02: Syphilis - 1945-1969; 1935-1943

Scope and Content: Research on syphilis in these records comprises materials covering three projects at the Johns Hopkins University School of Hygiene and Public Health (SHPH): 1) laboratory studies on the fundamental biology of syphilis and other spirochetal diseases; 2) field studies on syphilis in the Eastern Health District of Baltimore City, and 3) the Training Program in Venereal Disease. The bulk of reports contained in these records concern the field and laboratory research. Laboratory studies and epidemiological research as well as the Training Program in Venereal Diseases were all funded by the International Health Division of The Rockefeller Foundation between 1937 and 1949. From

1947-1948, Laboratory studies were also funded by the U. S. Public Health Service (NIH). Starting in 1949, a grant from George Moffett and later from the Whitehall Foundation helped fund research on venereal diseases, particularly syphilis. From 1954 onward, Whitehall Foundation funds were applied to research on chronic and infectious diseases in the Department of Microbiology. The Whitehall Foundation funded research at Johns Hopkins conducted by Turner and his colleagues for over twenty years, until 1970.

1) Laboratory Studies: Due to limited facilities available for laboratory work and laboratory animals in the Syphilis Division of the Johns Hopkins University School of Medicine, this work was transferred to the SHPH where more adequate facilities could be made available. This also allowed for broadening of the scope of investigations. The International Health Division of The Rockefeller Foundation funded the establishment of the laboratory, which was set up in the Department of Microbiology. Investigations conducted by Turner and colleagues included: the cultivation of *Treponema pallidum*, immunity in syphilis, and the interrelationship of various organisms belonging to the *Treponema* group. To this was later added the study of spirochetal antigens for purposes of facilitating diagnosis.

Accomplishments of this body of research include, among others: 1) development of the only available method of long term in vitro maintenance of the spirochetes of syphilis, yaws and relapsing fever, through freezing (at minus 70 degrees Celsius). This method, developed first for syphilis, aided in the transportation of strains of treponematoses from field and hospitals to central research laboratories. 2) An elucidation of important biological relationships within the *Treponema* group of organisms. 3) Study of the mechanisms of immunity in syphilis and the first clear demonstration of the humoral nature of immunity in syphilis, out of which grew the work on the T. P. I. test and recognizing biologic false positives. 4) additionally, a range of studies included development of a method for the rapid testing of anti-syphilitic drugs (antispirochetal activity of antibiotics); the survival time of *T. pallidum* in blood stored in blood banks and dried plasma; studies on the epidemiology of leptospiral jaundice; and isolation of various antigenic fractions of spirochetes for finding a more specific antigen for use in the serological diagnosis of syphilis. Discoveries at the SHPH by Nelson and Mayer of a treponemal immobilizing antibody, an antibody specific for *T. pallidum* and closely related organisms, resulted in the treponemal pallidum immobilization antibody (T.P.I.) test that was used for the detection of treponemal infections, improving the diagnosis of syphilis. Studies by Paul H. Hardy and Ellen Nell resulted in the development of a *Treponema pallidum* agglutination (T. P. A.) test, used for detecting antibodies against *Treponema pallidum*.

2) Field Studies on syphilis in the Eastern Health District of Baltimore City, 1937-1949: These studies were conducted by the SHPH in collaboration with the city of Baltimore Health Department.

In 1937, Turner began a study on the incidence of syphilis in the Eastern Health District from 1932 to 1937. From these investigations he

Scope and Content: Collection materials include letters between Turner and WHO administrative staff and researchers around the world about treponemal

disease research and sharing sera samples and antigen. There are copies of the agreement between the JHU SHPH and the WHO regarding the establishment and operation of the International Treponematos Laboratory Center at Johns Hopkins University. There are also correspondence about sharing publications on medical research. There are monographs and WHO newsletter issues and bibliography. There are lists of strains of treponemes that had been isolated at the Center. Diseases covered in the materials include, primarily, syphilis and yaws, as well as some materials about bejel and pinta. There are materials pertaining to Turner's attendance at international WHO meetings, conferences, symposia, and congresses, as well as on WHO committees, including the Subcommittee on Serology and Laboratory Aspects. There are descriptions and reports by Turner about the International Treponematos Laboratory Center as well as descriptions of treponematos studies and regional venereal disease clinics.

Sub-sub-sub-sub-series 4.4.08.04.01: Jamaica Yaws Commission Study - 1932-1936; undated

Scope and Content: At the request of the government of Jamaica, the International Health Division (IHD) of the Rockefeller Foundation undertook a cooperative investigation, between IHD and the Jamaican government, in order to devise a more effective means of controlling Yaws in the country. Between 1932 and 1934, Thomas B. Turner was the clinical director of a study of the clinical and epidemiological manifestations of Yaws in typical endemic areas of Jamaica. He ran a clinic in the village of Bath, parish of St. Thomas. Attached to the field clinic was a small laboratory in which tests on blood, urine, and spinal fluid were conducted. More complex laboratory procedures were carried out in the central laboratory in Kingston, where the program's headquarters was located. Clinical and survey research of the inhabitants was conducted. Nine areas were originally targeted for study and treatment. Two districts documented in the Turner collection include Bath in the parish of St. Thomas and Seaforth. Research on treatments comprised testing the efficacy of various drugs, alone or in combination. Drug testing was carried out on patients with all stages of the disease. Drugs tested include neo-arsphenamine and bismuth salicylate. Patients were examined and given drug therapy and revisited after a lapse of several months. At least two semi-mobile treatment units were organized as a means of controlling yaws in highly infected areas. Treatment units

were also used to evaluate the comparative benefits of drug therapies and to collect further information about the disease. A special survey unit was also set up to establish the distribution and incidence of yaws throughout Jamaica under varying environmental conditions. The survey, conducted by teams of sanitary inspectors trained in public health work, consisted of a history of yaws for each individual and an examination. Studies were also conducted on the transmission of the disease and this research included an entomological unit.

Turner continued this work from the IHD laboratories in New York City between 1934 and 1936. He investigated and made recommendations regarding treatment, environmental factors, and educational programs. Based on the Jamaica Yaws Commission Study a plan for the control of Yaws in Jamaica was devised and put into operation. Turner also investigated the immunological relationship between yaws and syphilis.

Materials include correspondence; blank and completed forms; graphs and tables; case histories; clinical examination and treatment notes, laboratory animal notes, and regional inspection notes; and reports.

Archival Arrangement: Folders are approximately in chronological order by date.

Related Archival Materials Element: Series 8.1.1 includes two publications that document Turner's research in Jamaica: Yaws in Jamaica, I. An epidemiological study of two rural communities by Thomas B. Turner and George M. Saunders. American Journal of Hygiene 21, 483-521, 1935. Yaws in Jamaica, II A plan of control based upon treatment by Thomas B. Turner, George M. Saunders, and H. M. Johnston, Jr. American Journal of Hygiene 21, 522-539, 1935.; Series 9 contains numerous photographs documenting Turner's clinical work in Jamaica.

Series 6: External Institutional Affiliations Files - 1921; undated; 1938-1940; 1935-1936; 1880; 1910-1911; 1917-1918; 1942-2002; 1932

Scope and Content: Materials in this series pertain to Turner's numerous memberships, consultancies, committee work and related participation in scientific, governmental, and community organizations. Turner served as a leader and a consultant for many governmental and scientific organizations. During the 1940s and 1950s, he sat on committees concerned with funding research on venereal diseases, especially syphilis and gonorrhea, including for projects with an emphasis on treatment for military personnel. He was a consultant for the World Health Organization in the early years of its international campaign to control yaws, syphilis, and other treponemal diseases. He also was an advisor for the National Foundation for Infantile Paralysis (NFIP) on polio research study procedures. For many years he was an active alumnus and member of the Board of Visitors and Governors of St. John's College. He was a longtime member of several local clubs. This series includes Turner's military service records with the U. S. Army during World War II. The external affiliations forming the bulk of this series include: American Social Health Association (ASHA), National Foundation for Infantile Paralysis (NFIP), National Research Council (NRC), Rockefeller Foundation, Society of Medical Consultants to the Armed Forces, St. Johns' College, the U. S. Army, the U. S. Public Health Service (USPHS) and the National Institutes of Health (NIH), and the World Health Organization (WHO). Material types include: correspondence; charts, donors lists; financial statements; governing documents; grant applications, short manuscripts; meeting agendas and minutes; news clippings; news releases; notes; publications (bulletins & newsletters); reports; rosters (of the organization's members and committees); surveys; and tables of statistics about programs funded.

Archival Arrangement: This series is divided into several sub-series, one for each organization with which Turner was affiliated. Sub-series are arranged in alphabetical order by organization name. Within sub-series, folders are arranged in alphabetical order by folder title. The World Health Organization records are further divided into sub-sub-series.

Sub-series 6.01: Alpha Omega Alpha (AOA) Honor Medical Society - 1983-1984; 2001; 1993

Scope and Content: Materials include correspondence; assignment of copyright for Turner's "Short History of The Johns Hopkins University"; AOA quarterly publication, The Pharos, fall 1984.

Sub-series 6.65: World Health Organization (WHO) - undated; 1974-1975; 1947-1972; 1982

Scope and Content: A strength of this collection is its documentation of the WHO's international program to control venereal diseases, particularly syphilis, yaws, gonorrhoea, bejel, and pinta. Turner played an important role in this project as Director of the International Treponematoses Laboratory Center that was established in the Department of Microbiology at the Johns Hopkins School of Hygiene and Public Health. This laboratory cooperated with local laboratories and field teams in various countries worldwide in the study of clinical, epidemiological, and serological problems as well as training personnel within the field. Blood serum specimens and infected animals were shipped to the laboratory and from the Center to researchers around the globe. In addition to his role at the Center, Turner was a committee member, consultant, and medical advisor to the WHO.

Archival Arrangement: This series is divided into eight sub-series. Within sub-series folders are arranged in alphabetical order by title with the exception of the conference files that are arranged in chronological order by date of conference and the publications files that are arranged in chronological order by year of publication.

Series 7: Editorial Files - 1994; undated; 1987; 1941; 1974-1976; 1938; 1970-1971; 1944-1968; 1990-1992; 1978-1984

Scope and Content: This series comprises documents pertaining to Turner's work as an editor. The bulk of

these files concern the Preventive Medicine in World War II. This multiple volume series is one of several that together comprise the official history of the Medical Department of the U.S. Army during World War II. Prepared by the Historical Unit of the U. S. Army Medical Service the series was published under the direction of the Surgeon General of the U. S. Army between the years 1955 and 1976. Turner was on the Advisory Editorial Board for the entire series and served for a time as the board's chairman. He was also a consultant to the Historical Division and a contributor to the series. Series volumes were reprinted over these years. The Editor-in-Chief of Preventive Medicine up until 1963 was John Boyde Coates; and the Chairman of the Advisory Editorial Board of Preventive Medicine from 1955 onward was Stanhope Bayne-Jones.

Preventive Medicine materials include Advisory Editorial Board meeting agendas and minutes; photographic prints of the Advisory Editorial Board; book reviews of Preventive Medicine; correspondence; publisher instructions for authors; annotated drafts and revisions of chapters; published chapters; notes; series, volume, and chapter outlines; and reports pertaining to progress of the project. There are also copies of reports from the institutional records of the History Unit of the U. S. Army Medical Service.

Preventive Medicine in WWII Volume Titles: Volume I: Organization and Operation of the Preventive Medicine Program; Volume II: Environmental Hygiene; Volume III: Personal Health Measures and Immunization; Volume IV: Communicable Diseases: Transmitted Chiefly through Respiratory and Alimentary Tracts; Volume V: Communicable Diseases: Transmitted through Contact or by Unknown Means; Volume VI: Communicable Diseases: Malaria; Volume VII: Communicable Diseases: Arthropodborne Diseases other than Malaria; Volume VIII: Civil Affairs/Military Government Public Health Activities (note: Turner contributed chapters to this volume); Volume IX: Special Fields (Training, health education, occupational health, disabilities due to climate, medical intelligence, enemy prisoners, medical laboratories).

The editorial records also include materials pertaining to Turner's membership on the editorial board of the American Journal of Hygiene. These documents include correspondence; addenda to minutes; hand written notes; reports on sales of reprinted issues and back volumes; statements of accounts; and stock inventory. Additionally, there are two issues of The Johns Hopkins Medical Journal. Turner was the Chairman of the Editorial Board; issue number 1 includes an editorial authored by him about the journal. There is also a small set of correspondence with journals for which Turner reviewed submissions including, the American Journal of Epidemiology, The Johns Hopkins Medical Journal, The Johns Hopkins University Press, Medicine, and Sexually Transmitted Diseases. Supporting documents among the correspondence include reviews by Turner and copies of published articles.

Series 8: Publication and Writing Files - 1883; 1984-1988; 1912-1923; 1891; 1925-1982; undated; 1897-1898; 1990-2001; 1859; 1901-1910

Archival Arrangement: The publication materials are divided into two Sub-series, one with publications by Turner and one with publications by other authors.

Sub-series 8.1: Manuscripts and Publications by Thomas B. Turner - 1930; 1990-2001; 1932-1939; 1918-1920; 1984-1988; undated; 1941-1982

Scope and Content: These files comprise a large set of Turner's prolific publications. There are many reprints about research and treatment of the treponematoses, principally syphilis, and also yaws. There are also many works pertaining to medical education and the history and achievements of the Johns Hopkins medical institutions, as well as the history of medicine.

Material types include journal articles; book announcements; book chapters; book reviews of Turner's books; book reviews by Turner of other author's books; correspondence; galley proofs; annotated manuscript drafts; letters to the editor of The New York Times and the Baltimore Sun; monographs; notes; review lists; reviewer's comments; and reprints. There are several manuscripts of unpublished works by Turner, including a prospective book on Medicine as a Career and article length papers pertaining to Turner's series on Yaws. Correspondence includes mostly publisher's correspondence; requests for reprints of Turner's articles; and

letters by colleagues containing inquiries and expressions of appreciation for Turner's books and articles.

Archival Arrangement: Turner's publication files are divided into four Sub-sub-series by material type. Book files are further divided into seven Sub-sub-sub-series by book publication. Records within each grouping are arranged in chronological order by publication date.

Sub-sub-series 8.1.1: Articles, Book Chapters, Editorials, and Reprints - 1930; 1932-1939; 1941-1954; undated; 2000; 1918-1919; 1998; 1984-1985; 1956-1961; 1991-1996; 1963-1982

Archival Arrangement: Materials are arranged in chronological order by publication date.

Folder 8.1.1.001: Correspondence, General - 1958; 1965; 1995-1996; 1977; 1979; 1998; 1974

Extent: 1 folder

Folder 8.1.1.002: The Race and Sex Distribution of the Lesions of Syphilis in 10,000 Cases by Thomas B. Turner - 1930

Extent: 1 folder

Scope and Content: Reprinted from the Bulletin of The Johns Hopkins Hospital, XLVI (2): 159-184, February 1930

Folder 8.1.1.003: Experimental Yaws I. Comparison of the Availability of the Rabbit and Monkey for the Isolation of Strains of Yaws by Thomas B. Turner and J. H. Chambers - 1932

Extent: 1 folder

Scope and Content: Bulletin of The Johns Hopkins Hospital, 1932, 50, No. 4: 253-269

Folder 8.1.1.004: Experiments Demonstrating that Acquired Immunity in Syphilis is Not Dependent upon Allergic Inflammation by Arnold R. Rich, Alan M. Chesney, and Thomas B. Turner - 1933

Extent: 1 folder

Scope and Content: Bulletin of The Johns Hopkins Hospital, 52, 1933: 179-202

Folder 8.1.1.005: Studies in Experimental Syphilis X. Observations on Cross-Inoculations with Heterologous Strains of Syphilitic Virus by Alan M. Chesney, Thomas B. Turner, and Franklin H. Grauer - 1933

Extent: 1 folder

Scope and Content: Bulletin of The Johns Hopkins Hospital, 52, 1933: 145-155

Folder 8.1.1.006: Experimental Yaws II. Comparison of the Infection with Experimental Syphilis by Thomas B. Turner and Alan M. Chesney - 1934

Extent: 1 folder

Scope and Content: Reprinted from Bulletin of The Johns Hopkins Hospital, LIV (3), March, 1934: 174-185

Folder 8.1.1.007: The Duration of Motility of the Spirochaetes of Yaws in a Small West Indian Fly – Hippelates Pallipes Loew by Henry W. Kumm, Thomas B. Turner, and Alfred A. Peat - 1935

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Tropical Medicine, 15 (2), March, 1935

Folder 8.1.1.008: Yaws in Jamaica I. An Epidemiological Study of Two Rural Communities by Thomas B. Turner and George M. Saunders - 1935

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, 21 (3), 483-521, May, 1935

Folder 8.1.1.009: Yaws in Jamaica II. A Plan of Control Based upon Treatment by Thomas B. Turner, George M. Saunders, and H. M. Johnston - 1935

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, 21 (3), 522-539, May, 1935

Folder 8.1.1.010: The Resistance of Yaws and Syphilis Patients to Reinoculation with Yaws Spirochetes by Thomas B. Turner - 1935-1936

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, 23 (3): 431-448, May, 1936.

Folder 8.1.1.011: The Transmission of Yaws from Man to Rabbits by an Insect Vector, Hippelates Pallipes Loew by Henry W. Kumm and Thomas B. Turner - 1936

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Tropical Medicine, 16 (3), 522-539, May, 1936

Folder 8.1.1.012: The Preservation of Virulent Treponema Syphilis and Treponema Pertenuis in the Frozen State by Thomas B. Turner - 1936

Extent: 1 folder

Scope and Content: Reprinted from The Journal of Clinical Investigation, XV (4), July, 1936

Folder 8.1.1.013: Comparative Histology of Yaws and Syphilis in Jamaica by Henry W. Ferris and Thomas B. Turner - 1937

Extent: 1 folder

Scope and Content: Reprinted from The Archives of Pathology, 16, 703-707, December, 1937.

Folder 8.1.1.014: Studies on the Relationship between Yaws and Syphilis by Thomas B. Turner - 1937

Extent: 1 folder

Folder 8.1.1.015: Comparison of Cutaneous Lesions Produced in Rabbits by Intracutaneous Inoculation of Spirochetes from Yaws and Syphilis by Henry W. Ferris and Thomas B. Turner - 1938

Extent: 1 folder

Scope and Content: Reprinted from the Archives of Pathology August 1938, 26: 491-500.

Folder 8.1.1.016: Postgraduate Education in Syphilis by Thomas B. Turner - 1938

Extent: 1 folder

Scope and Content: Reprinted from Venereal Disease Information, 19, May, 1938

Folder 8.1.1.017: The Qualifications of a Venereal Disease Control Officer by Thomas B. Turner - 1938

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases, 22 (3), 269-278, May, 1938

Folder 8.1.1.018: Protective Antibodies in the Serum of Syphilitic Rabbits by Thomas B. Turner - 1939

Extent: 1 folder

Scope and Content: Reprinted from The Journal of Experimental Medicine, 69 (6), 867-890, June, 1939

Folder 8.1.1.019: Prolonged Maintenance of Spirochetes and Filtrable Viruses in the Frozen State by Thomas B. Turner and William L. Fleming - 1939

Extent: 1 folder

Scope and Content: Reprinted from The Journal of Experimental Medicine, December 1, 1939, Vol. 70, No. 6: 629-637

Folder 8.1.1.020: Factors Influencing the Survival of Spirochetes in the Frozen State by Thomas B. Turner and Nancy L. Brayton - 1939

Extent: 1 folder

Scope and Content: Reprinted from The Journal of Experimental Medicine, December 1, 1939, Vol. 70, No. 6: 639-650

Folder 8.1.1.021: Duration of Infectivity of Treponema Pallidum in Citrated Blood Stored under Conditions Obtaining in Blood Banks by Thomas B. Turner and Thomas H. Diseker - 1941

Extent: 1 folder

Scope and Content: Reprinted from Bulletin of The Johns Hopkins Hospital, LXVIII (3), 269-279, March, 1941

Folder 8.1.1.022: The Viability of the Spirochetes of Syphilis and Yaws in Desiccated Blood Serum by Thomas B. Turner, Johannes H. Bauer, and Fred C. Kluth - 1941

Extent: 1 folder

Scope and Content: Extracted from the American Journal of the Medical Sciences, 202 (3), 416-423, September, 1941

Folder 8.1.1.023: Cross Immunity in Experimental Syphilis, Yaws, and Venereal Spirochetosis of Rabbits, by Thomas B. Turner and Charlotte McLeod - 1942

Extent: 1 folder

Scope and Content: Reprinted from the Transactions of the Association of American Physicians, 1942, 1 (vii): 265.

Folder 8.1.1.024: Some Aspects of Venereal Disease Prevention in Wartime by Thomas B. Turner - 1942

Extent: 1 folder

Scope and Content: Reprinted from the Journal of Social Hygiene, 1942 December

Folder 8.1.1.025: Studies on Syphilis in the Eastern Health District of Baltimore City III. Study of the Prevalence of Syphilis Based on Specific Age Groups of an Enumerated Population by E. Gurney Clark and Thomas B. Turner - 1942

Extent: 1 folder

Scope and Content: Reprinted from the American Journal of Public Health, 32 (3), March, 1942

Folder 8.1.1.026: The Mouse-adapted Lansing Strain of Poliomyelitis Virus I. A Study of Neutralizing Antibodies in Acute and Convalescent Serum of Poliomyelitis Patients by Thomas B. Turner and Lawrence E. Young - 1943

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, January 1943, Vol. 37, No. 1: 67-79.

Folder 8.1.1.027: Studies on Syphilis in the Eastern Health District of Baltimore City I. Principles Concerned in Measuring the Frequency of the Disease by Thomas B. Turner - 1943

Extent: 1 folder

Scope and Content: Reprinted from the American Journal of Public Health, 37 (3), May, 1943

Folder 8.1.1.028: Studies on Syphilis in the Eastern Health District of Baltimore City II. Discovery Rates as an Index of Trend by Thomas B. Turner, Robert Dyar, E. Gurney Clark, and Mary Footner Birkhead - 1943

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, 37 (3), May, 1943

Folder 8.1.1.029: Immediate Wartime Outlook and Indicated Post-war Conditions with Respect to the Control of the Venereal Diseases by Thomas B. Turner - 1943

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Public Health, 1943 November 33 (11).

Folder 8.1.1.030: Chapter by Thomas B. Turner in A Text-Book of Medicine by American Authors (1943) edited by Russell L. Cecil (Correspondence) - 1942

Extent: 1 folder

Scope and Content: Multiple editions were published. Documents include correspondence that pertain to Turner's contribution of a chapter to the sixth edition.

Folder 8.1.1.031: The Treatment of Sulfonamide Resistant Gonorrhea with Penicillin Sodium, Results in 1,686 Cases by Thomas H. Sternberg and Thomas B. Turner - 1944

Extent: 1 folder

Scope and Content: Reprinted from The Journal the American Medical Association, September 16, 1944, Vol. 126: 157-160

Folder 8.1.1.032: Health Programs Under Military Government by James S. Simmons, Thomas B. Turner, and Ira V. Hiscock - 1945

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Public Health, January 1945 35 (1)

Folder 8.1.1.033: The Mouse-Adapted Lansing Strain of Poliomyelitis Virus IV. Neutralizing Antibodies in the Serum of Healthy Children by Thomas B. Turner, Lawrence E. Young, and Elizabeth Starbuck Maxwell - 1945

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, September, 1945, Vol. 42, No. 2: 119-127.

Folder 8.1.1.034: Studies on the Biologic Relationship between the Causative Agents of Syphilis, Yaws, and Venereal Spirochetosis of Rabbits I. Observations on Treponema Cuniculi Infection in Rabbits by Charlotte McLeod and Thomas B. Turner - 1946

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases 30, no. 5 (September 1946): 442-454.

Folder 8.1.1.035: Studies on the Biological Relationship Between the Causative Agents of Syphilis, Yaws, and Venereal Spirochetosis of Rabbits II. Comparison of the Experimental Disease Produced in Rabbits by Charlotte McLeod and Thomas B. Turner - 1946

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases 30, no. 5 (September 1946): 455-462.

Folder 8.1.1.036: Studies on Syphilis in the Eastern Health District of Baltimore City, IV. Syphilis Among Parturient Women as an Index of the Trend of Syphilis in the Community by George M. Leiby, Thomas B. Turner, E. Gurney Clark, Robert Dyar, and Fred C. Kluth - 1947

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, 46 (2), September, 1947: 260-267

Folder 8.1.1.037: Cross Immunity in Experimental Syphilis, Yaws, and Venereal Spirochetosis of Rabbits, by Thomas B. Turner, Charlotte McLeod, and Elaine L. Updyke - 1947

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Hygiene, September 1947 46 (2): 287-295

Folder 8.1.1.038: Comparative Effectiveness of Penicillins G, F, K, and X in Experimental Syphilis as Determined by a Short In Vivo Method by Thomas B. Turner, Mary C. Cumberland, and Huan-ying Li - 1947

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases, September 1947 31 (5): 476-484

Folder 8.1.1.039: Comparative Effectiveness of Penicillins G, F, K, and X in Experimental Relapsing Fever by Mary C. Cumberland and Thomas B. Turner - 1947

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases, September 1947 31 (5): 485-488

Folder 8.1.1.040: Distribution of Funds for Medical Research by Thomas B. Turner - 1948

Extent: 1 folder

Scope and Content: Reprinted from Science, April 16, 1948, Vol. 107, No. 2781: 391

Folder 8.1.1.041: Protective Antibodies in the Serum of Syphilitic Patients by Thomas B. Turner, Fred C. Kluth, Charlotte McLeod, and Charles P. Winsor - 1948

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, September 1948 48 (2): 173-181

Folder 8.1.1.042: The Rate of Multiplication of Treponema Pallidum in Normal and Immune Rabbits by Mary C. Cumberland and Thomas B. Turner - 1949

Extent: 1 folder

Scope and Content: Reprinted from American Journal of Syphilis, Gonorrhea, and Venereal Diseases 33, no. 3 (May 1949).

Folder 8.1.1.043: Isolation of the Treponema Pallidum from Three Patients with Visceral Syphilis by Means of Animal Inoculation by Evan Calkins, Frank London, Sherman M. Mellinkoff, Thomas Van Meter, and Thomas B. Turner - 1950

Extent: 1 folder

Scope and Content: Reprinted from the Bulletin of The Johns Hopkins Hospital 87, no. 1 (July 1950): 61-73.

Folder 8.1.1.044: Age Incidence and Seasonal Development of Neutralizing Antibodies to Lansing Poliomyelitis Virus by Thomas B. Turner, David H. Hollander, Sonia Buckley, U. Pentti Kokko, and Charles P. Winsor - 1950; 1976

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, November 1950, Vol. 52, No. 3: 323-347

Folder 8.1.1.045: Cortisone in Experimental Syphilis (A Preliminary Note) by Thomas B. Turner and David H. Hollander - 1950

Extent: 1 folder

Scope and Content: Reprinted from the Bulletin of The Johns Hopkins Hospital 87, no. 5 (November 1950): 505-509.

Folder 8.1.1.046: The Relationship of Treponemal Immobilizing Antibody to Immunity in Syphilis by Thomas B. Turner and Robert A. Nelson - 1950

Extent: 1 folder

Scope and Content: Reprinted from the Transactions of American Physicians lxxiii (1950): 112.

Folder 8.1.1.047: Immunological Relationships Among Species and Strains of Virulent Treponemes as Determined with the Treponemal Immobilization Test by Abdus Saleem Khan, Robert A. Nelson, and Thomas B. Turner - 1951

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene 53, no. 3 (May 1951): 296-316.

Folder 8.1.1.048: The Effect of Long Continued Subcurative Doses of Penicillin during the Incubation Period of Experimental Syphilis by David H. Hollander, Thomas B. Turner, and E. Ellen Nell - 1952

Extent: 1 folder

Scope and Content: Reprinted from the Bulletin of The Johns Hopkins Hospital 90, no. 2 (February 1952): 105-120.

Folder 8.1.1.049: Studies on Treponemes from Cases of Endemic Syphilis by Thomas B. Turner and David H. Hollander - 1952

Extent: 1 folder

Scope and Content: Bulletin of the World Health Organization 7 (1952): 75-81.

Folder 8.1.1.050: Too Casual with Death by Thomas B. Turner - 1953

Extent: 1 folder

Scope and Content: The Baltimore Sun, July 14, 1953

Folder 8.1.1.051: Steps Proposed in Enlarging the Fight on Chronic Diseases by Thomas B. Turner - 1953

Extent: 1 folder

Scope and Content: The New York Times, September 22, 1953

Folder 8.1.1.052: A Mouse Neutralization Test for Lansing Poliomyelitis Antibody Employing a Small Amount of Whole Blood by U. Pentti Kokko, David H. Hollander, and Thomas B. Turner - 1953

Extent: 1 folder

Scope and Content: Reprinted from The American Journal of Hygiene, November, 1953, Vol. 58, No. 3: 377-384

Folder 8.1.1.053: Studies on the Mechanism of Action of Cortisone in Experimental Syphilis by Thomas B. Turner and David H. Hollander - 1953-1954

Extent: 1 folder

Scope and Content: Two reprints included: 1) Reprinted from The Effect of ACTH and Cortisone upon Infection and Resistance, (Chapter 9) edited by Gregory Shwartzman, Columbia University Press, 1953. 2) Reprinted from the American Journal of Syphilis, Gonorrhoea, and Venereal Diseases 38, no. 5 (September 1954): 371-387.

Folder 8.1.1.054: The Comparative Effect of Various Antibiotics in Experimental Syphilis by Thomas B. Turner and Katherine Schaeffer (Charts) - circa 1954

Extent: 1 folder

Scope and Content: American Journal of Syphilis, Gonorrhoea and Venereal Diseases, 1954 March, 38: 81-91. Folder documents comprise only charts.

Folder 8.1.1.055: Studies on the Duration of Protection Afforded by Active Immunization Against Tetanus by Thomas B. Turner, Edward S. Stafford, and Leon Goldman - 1954

Extent: 1 folder

Scope and Content: Reprinted from the Bulletin of The Johns Hopkins Hospital, April, 1954, Vol. 94, No. 4: 204-217

Folder 8.1.1.056: Attitudes in Southeast Asia by Thomas B. Turner - 1954

Extent: 1 folder

Scope and Content: Sun Paper, October 11, 1954

Folder 8.1.1.057: On the Permanence of Anti-Tetanus Immunization by Edward S. Stafford, Thomas B. Turner, and Leon Goldman - 1954

Extent: 1 folder

Scope and Content: Reprinted from Annals of Surgery, October 1954, Vol. 140, No. 4: 563-568

Folder 8.1.1.058: Studies on the Prevention and Treatment of Tetanus by Thomas B. Turner - 1956

Extent: 1 folder

Scope and Content: Reprinted from U.S.T. Journal of Medicine, March-April, 1956, Vol. XI, No. 2

Folder 8.1.1.059: Studies on the Prophylaxis and Treatment of Tetanus I. Studies Pertaining to Active and Passive Immunization by Sara Prudovsky and Tomas B. Turner - 1958

Extent: 1 folder

Scope and Content: Reprinted from Bulletin of The Johns Hopkins Hospital, February, 1958, Vol. 102, No. 2: 55-70

Folder 8.1.1.060: Studies on the Prophylaxis and Treatment of Tetanus II. Studies Pertaining to Treatment by Tomas B. Turner, Emiliana A. Velasco-Joven, and Sara Prudovsky - 1958

Extent: 1 folder

Scope and Content: Reprinted from Bulletin of The Johns Hopkins Hospital, February, 1958, Vol. 102, No. 2: 71-84

Folder 8.1.1.061: The Liberal Arts in Medical Education by Thomas B. Turner - 1958

Extent: 1 folder

Scope and Content: Reprinted from the Association of American Colleges Bulletin. 1958 mar;XLIV(1):1-7

Folder 8.1.1.062: A Reduction of Time for Medical Education by Thomas B. Turner - 1957-1958

Extent: 1 folder

Scope and Content: Clubwoman Magazine, April 1958

Folder 8.1.1.063 - 8.1.1.064: The Spirochetes by Thomas B. Turner - 1957-1958; 1963-1966

Extent: 2 folders

Scope and Content: Book Chapter (24) in Bacterial and Mycotic Infections of Man by Rene Jules Dubos and James G. Hirsch. Philadelphia: J. B. Lippincott Company; 1958; 1965

Folder 8.1.1.065: Integration of the Arts and Sciences with Medicine by Thomas B. Turner - 1959

Extent: 1 folder

Scope and Content: Published as A Blending of Interests, A series of papers read at the Congress on Medical Education and Licensure, Chicago, Illinois, February 10, 1959

Folder 8.1.1.066: Chapter by Thomas B. Turner in A Text-Book of Medicine, (1959) Edited by Russell L. Cecil (Correspondence) - 1957

Extent: 1 folder

Scope and Content: Multiple editions were published. Documents include correspondence that pertain to Turner's contribution to the tenth edition of at least one chapter, on relapsing fever.

Folder 8.1.1.067: The Effect of the Temperature of Incubation on the Spread of Herpes Simplex Virus in an Immune Environment in Cell Culture by M. David Hoggan, Bernard Roizman, and Thomas B. Turner - 1960

Extent: 1 folder

Scope and Content: Reprinted from The Journal of Immunology, February, 1960, Vol. 84, No. 2

Folder 8.1.1.068: Symposium on Medical Education I. Appropriate Balance between the Basic and Clinical Sciences in Medical School from the Viewpoint of a Dean by Thomas B. Turner - 1961

Extent: 1 folder

Scope and Content: The Journal of The American Medical Association. 1961 jun;176(9):81-82

Folder 8.1.1.069: Postgraduate Education in Medicine by Thomas B. Turner - 1960-1961

Extent: 1 folder

Scope and Content: Reprinted from The Journal of The American Medical Association. 1961 jul;177:55-57

Folder 8.1.1.070: Where are We Going? By Thomas B. Turner (draft) - 1961

Extent: 1 folder

Scope and Content: The Johns Hopkins News-Letter

Folder 8.1.1.071: Aiding Medical Schools, Bill Providing Incentive Funds for Universities is Backed (Letter to the Editor of The New York Times by Thomas B. Turner) - 1963

Extent: 1 folder

Folder 8.1.1.072: Letter to the Editor of The New York Times - 1963

Extent: 1 folder

Extent: 1 folder

Scope and Content: The Education of a Physician, The Johns Hopkins University, 1964

Folder 8.1.1.074: Continuing Medical Education for the Practicing Physician by Thomas B. Turner (draft) - 1966

Extent: 1 folder

Scope and Content: California Medicine, Vol. 105, No. 6 (December 1966):484-485

Folder 8.1.1.075: The Medical Schools Twenty Years Afterwards: Impact of the Extramural Research Support Programs of the National Institutes of Health by Thomas B. Turner - 1969; 1966-1967

Extent: 1 folder

Scope and Content: Reprinted from the Journal of Medical Education, February 1967, 42 (2): 1-10

Folder 8.1.1.076: Cecil-Loeb Textbook of Medicine (Correspondence) - 1967

Extent: 1 folder

Scope and Content: 12th Edition, Edited by Beeson, McDermott, Cecil, and Loeb

Folder 8.1.1.077: Medical Education in Transition by Thomas B. Turner - 1967

Extent: 1 folder

Scope and Content: International Medical Digest, July 1967, Vol. 83, No. 7

Folder 8.1.1.078: Substantial Benefits: An editorial by Thomas B. Turner - 1967

Extent: 1 folder

Scope and Content: Horizons, Vol. 1, No. 1 (September 1967)

Folder 8.1.1.079: The Medical Curriculum in Evolution by Thomas B. Turner - 1967

Extent: 1 folder

Scope and Content: Reprinted from the Journal of Medical Education. 1967 October, 42 (10): 926-929

Folder 8.1.1.080: "Relapsing Fever," "Syphilis," and "Vincent's Angina" by Thomas B. Turner in McGraw-Hill Encyclopedia of Science and Technology - 1967-1968

Extent: 1 folder

Folder 8.1.1.081: Infectivity Tests in Syphilis by Thomas B. Turner, Paul H. Hardy, and Burlina Newman - 1969

Extent: 1 folder

Scope and Content: Reprinted from British Journal of Venereal Diseases, September 1969, Vol. 45, No. 3

Folder 8.1.1.082: Letters between Turner and Julius B. Richmond in Currents in American Medicine, A Developmental View of Medical Care and Education by Julius B. Richmond - 1969

Extent: 1 folder

Folder 8.1.1.083: Education of Physicians by Thomas B. Turner - 1970

Extent: 1 folder

Scope and Content: Letter by Thomas B. Turner to the Editor of The New York Times Concerning Michael Crichton's Article, "The Miseducation of Doctors," October 27, 1970

Folder 8.1.1.084: Demonstration of a Virus-like Agent Contaminating Material Containing the Stockholm Substrain of the Nichols Pathogenic Treponema pallidum by H. Gudjonsson, B. Newman, and T. B. Turner - 1970

Extent: 1 folder

Scope and Content: Reprinted from British Journal of Venereal Diseases Vol. 46, no. 6 (December 1970)

Folder 8.1.1.085 - 8.1.1.086: Syphilis and the Treponematoses by Thomas B. Turner - 1967-1972; 1977

Extent: 2 folders

Scope and Content: Documents in these folders pertain to a book chapter (16) by Turner in Infectious Agents and Host Reactions Edited by Stuart Mudd. Philadelphia: W. B. Saunders Company; 1970.

Folder 8.1.1.087: Syphilis and the Treponematoses by Thomas B. Turner - 1970

Extent: 1 bound volume

Scope and Content: Materials comprise the book Infectious Agents and Host Reactions Edited by Stuart Mudd. Philadelphia: W. B. Saunders Company; 1970. Turner authored chapter 16, "Syphilis and the Treponematoses."

Folder 8.1.1.088: Screening Out a Virus-like Agent from the Testicular Suspension of the Nichols Pathogenic T. pallidum by H. Gudjonsson, B. Newman, and T. B. Turner - 1972

Extent: 1 folder

Scope and Content: Reprinted from British Journal of Venereal Diseases 48, no. 2 (April 1972)

Folder 8.1.1.089: Beer and Wine for Geriatric Patients by Thomas B. Turner - 1973

A large number are about treponemal diseases, especially syphilis. There are also works on other medical conditions and various medical topics as well as medical education and the history of medicine.

Archival Arrangement: Publication materials by other authors are divided into seven sub-sub-series by publication type. These are arranged in alphabetical order with the exception of books, which are last. Materials in two of these sub-sub-series, Reprints and Books, are further divided into Sub-sub-sub-series by topic, arranged in alphabetical order. Materials within each grouping are arranged in alphabetical order by author's surname.

Related Archival Materials Element: Sub-sub-series 6.65.06, WHO Publications, contains working papers pertaining to syphilis and the treponematoses.

Series 9: Photographs - 1932-1963; 1917-2000

Scope and Content: The majority of photographs in the Turner collection pertain to his clinical work and laboratory research. There are photographs from the Jamaica Yaws Commission Study of the clinic, patients, and countryside. There are slides pertaining to syphilis research, including photographs from the Eastern Health District of Baltimore City. There are also numerous images of laboratory rabbit experiments. The collection contains personal photographs of Turner, his friends, family, and colleagues. Materials include photographic prints, slides, and X-rays.

Sub-series 9.1: Clinical and Research photographs - 1932-1963

Scope and Content: This sub-series includes photographs from Thomas Turner's research on treponemal infections and other diseases. The majority of the photographs represent research studies with rabbit models (primarily syphilis, yaws, and herpes) and photographs of patients from Turner's work with the Jamaica Yaws Commission from 1932-1934. Also included are a number of teaching slides that illustrate Turner's research data.
